

Stratabound Minerals Corp. Announces Change of Name to Lode Gold Resources Inc.

19.01.2024 | [Newsfile](#)

Toronto, Jan. 19, 2024 - [Stratabound Minerals Corp.](#) (TSXV: SB) (OTCQB: SBMIF) ("Stratabound" or the "Company") announces that the Company has changed its name to Lode Gold Resources Inc. as part of its ongoing growth and restructuring plans. To further unlock value, the Company is contemplating a spin out of one or more of its orogenic exploration gold assets into a new company, Gold Orogen. New corporate websites are currently under construction, with the new domains [www.lode-gold.com](#) and [www.goldorogen.com](#), respectively.

Trading of the Company's common shares will remain on the TSX Venture Exchange, with the new trading symbol "LOD". The Company anticipates that the name and symbol change will take effect on Tuesday, January 23, 2024.

Shareholders will not be required to take any action in connection with the name change. Issued certificates representing common shares of the Company will not be affected by the name change and will not need to be exchanged. Following the name change, the new CUSIP number assigned to the Company's common shares will be 540196102 and the new ISIN number will be CA5401961027.

There is no consolidation of capital associated with the name change. The name change does not affect the rights of the Company's shareholders. The Company encourages shareholders to contact their broker with any questions regarding the name change.

ABOUT STRATABOUND MINERALS

[Stratabound Minerals Corp.](#) is a Canadian exploration and development company with grassroots and advanced exploration properties in highly prospective and safe mining jurisdictions.

Its Golden Culvert and Win Projects, Yukon, covering 99.5 km² across a 27-km strike length, are situated in a district-scale, high-grade-gold-mineralized trend within the southern portion of the Tombstone Gold Belt. Gold deposits and occurrences within the Belt include Fort Knox, Pogo, Brewery Creek and Dublin Gulch, and Snowline Gold's Valley target on its Rogue property in the Selwyn Basin.

Its McIntyre Brook Project, New Brunswick, covering 120 km² and a 17-km strike length in the emerging Triple Fault Gold Belt, is surrounded by Puma Exploration's Williams Brook Project (5.55 g/t Au over 50m) and is hosted by orogenic rocks of similar age and structure as New Found Gold's Queensway Project.

The Company is also advancing its Fremont Gold development project in the historic Mother Lode Gold Belt of California where 50,000,000 oz of gold has been produced. Fremont, located 500km north of Equinox Gold's Castle Mountain and Mesquite mines, has a PEA with an after-tax NPV of USD \$217MM, a 21% IRR, 11-year LOM, averaging 118k ounces per annum at USD \$1,750 gold. The project hosts an NI 43-101 resource of 1.16 MMoz at 1.90 g/t Au within 19.0 MMt Indicated, and 2.02 MMoz at 2.22 g/t Au within 28.3 MMt Inferred. The MRE evaluates only 1.4 km of the 4 km strike length of the Fremont property that features 4 gold-mineralized zones. Significantly, three step-out holes at depth hit structure, typical of orogenic deposits that often occur at depth. Fremont is located on private land in Mariposa, the original gold rush county and is 1.5 hours from Fresno, California. The property has year-round road access and is close to airports and rail. Please refer to the Fremont Gold project PEA dated Apr. 4, 2023 under NI 43-101 guidelines. The technical report has been reviewed and approved by independent "Qualified Persons" Eugene Puritch, P.Eng., FEC, CET, and Andrew Bradfield, P.Eng. both of P&E, and Travis Manning, P.E. of KCA.

The Company also holds a pipeline of early-stage exploration projects including the critical mineral Captain

Cobalt-Copper-Gold Deposit in New Brunswick and the Dingman Gold Project, Ontario.

QUALIFIED PERSON STATEMENT

The scientific and technical information contained in this press release has been reviewed and approved by Jonathan Victor Hill, Director, BSc (Hons) (Economic Geology - UCT), FAusIMM, and who is a "qualified person" as defined by National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101").
