Ari Sussman, Executive Chairman of Collective will be providing an overview of the Company's main Apollo porphyry system as well as it's newly announced porphyry discoveries. The Apollo porphyry system is large-scale, bulk-tonnage and high-grade copper-silver-gold-tungsten porphyry system.

The Company's flagship project, Guayabales, is anchored by the Apollo system. The Company's near-term objective is to drill the shallow portions of the Apollo system, continue to expand the overall dimensions of the system, which remains open in most directions and test newly generated grassroots targets. The Company is set to embark on its largest drill program to date with a minimum of 40,000 metres planned for 2024.
