

Kermode Reports 2023 Review and 2024 Plans for Vancouver Island Projects

07.02.2024 | [The Newswire](#)

"SANTA ANNA"

The following assays were previously reported by Kermode on December 5, 2023. The samples were taken from approximately thirteen areas of interest as part of an ongoing sampling program that commenced in August, 2023. Kermode previously published pictures of these samples and videos showing the exploration field work done to collect these samples and others.

Further information about all rock samples is provided below.

Further information about all rock samples is provided below.

Further information about all rock samples is provided below.

Qualified Person

The technical information in this news release has been reviewed and approved by Mr. Jacques Houle, P. Eng, a Qualified Person responsible for the scientific and technical information contained herein under National Instrument 43-101 standards. Mr. Houle is independent to Kermode.

QA/QC Statement

The most recent work conducted on the subject property by the Company utilized commercial laboratories

for all geochemical analyses and was conducted using industry-standard chain of custody procedures with all samples. Due to the preliminary nature of the field geochemistry programs, no blind analytical blanks and standards were utilized by the Company; and only the internal procedures employed by the commercial laboratories were utilized for QA/QC protocols. The Qualified Person is satisfied that these procedures and protocols are sufficient for the current status of the subject property. The assays were completed by ALS Canada Ltd. in Vancouver, BC.

About Kermode

Forward-Looking Statements

This news release contains statements that constitute "forward-looking statements" within the meaning of applicable Canadian and United States securities legislation (collectively herein referred to as "forward-looking information"). Such forward looking statements involve known and unknown risks, uncertainties and other factors that may cause Kermode actual results, performance or achievements, or developments in the industry to differ materially from the anticipated results, performance or achievements expressed or implied by such forward-looking statements.

Forward-looking statements in this document include but not limited to results, analyses and interpretations of exploration programs; our grassroots exploration program, geological and mineralization interpretations and the plans, results, costs, and timing thereof. Although Kermode believes the forward-looking information contained in this news release is reasonable based on information available on the date hereof, by their nature forward-looking statements involve assumptions, risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements.

This list is not exhaustive of the factors that may affect any of our forward-looking information. Although we have attempted to identify important factors that could cause actual results, actions, events, conditions, performance, or achievements to differ materially from those contained in forward-looking information, there may be other factors that cause results, actions, events, conditions, performance, or achievements to differ from those anticipated, estimated or intended.

The forward-looking information contained in this news release represents the expectations of the Company

as of the date of this news release and, accordingly, is subject to change after such date. Readers should not place undue importance on forward-looking information and should not rely upon this information as of any other date. While the Company may elect to, it does not undertake to update this information at any particular time except as required in accordance with applicable laws.
