

FokusMining Corp. To Resume Drilling On The Moriss Sector Of Galloway

28.02.2024 | [CNW](#)

ROUYN-NORANDA, Feb. 28, 2024 - [Fokus Mining Corp.](#) ("Fokus" or the "Company") (TSXV: FKM) (OTCQB: FKMCF) (FSE: F7E1) is pleased to announce that it now has begun its 1,250 metres of exploration drilling to further test the Moriss Sector following up on the 1,500 metre drill campaign from November (see results in the press release dated February 7, 2024) where the Company intersected some high-grade gold mineralization in gold bearing structures that seem to intersect the Moriss Zone perpendicularly .

"Jean Rainville, CEO and President of Fokus, stated that based on the significant gold values intersected in the five holes drilled in a westerly direction, the Company will conduct further exploration work to confirm the potential presence of a north-south trending mineralized system in the sector. This additional exploration work could greatly improve our understanding of the area and its potential, particularly in light of the previously confirmed existence of the east-west gold mineralized Moriss shear zone." As shown on Figure 1, the recent results of drilling on Moriss Zone are quite conclusive.

This new drill campaign of a minimum of 1,250 metres will consist of a minimum of six holes all drilled in the east-west direction (holes GA-24-83 to GA-24-88): four holes will have a length of 250 metres, one hole 200 metres and one hole 100 metres.

Also, the Company will soon receive assays on three holes that were drilled last December in the Hurd-Fayolle sector Northeast of Moriss.

Qualified Person

The scientific and technical disclosure for Fokus included in this news release have been reviewed and approved by Gilles Laverdière, P. Geo. Mr. Laverdière is a geologist and a qualified person under National Instrument 43-101 Standards of Disclosure of Mineral Projects ("NI 43-101") and a director of the Company.

About Fokus

[Fokus Mining Corp.](#) is a mineral resource company actively acquiring and exploring precious metal deposits located in the province of Quebec, Canada. In implementing this major undertaking within the Canadian mining industry, we are determined to unlock the secret of the Galloway gold project.

The Galloway project covers an area of 2,865.54 hectares and is located just north of the Cadillac-Larder Lake deformation which extends laterally for more than 100 km. Numerous gold deposits are related to that structure and its extensions. The current work focuses on a western portion of the mineral claims where several mineral occurrences have been identified.
