- Management is aiming to secure further surveys over the Andover North project

The heritage survey has been scheduled to commence on the 25th of March 2024, and will encompass areas where Raiden has defined priority targets for drilling over the high-grade lithium-bearing pegmatites at Andover South.

The Company is pleased to proactively engage with the Ngarluma Traditional Owners across the project area, where our objective is to ensure the Traditional Owners knowledge of the area is utilised to avoid areas of cultural significance.

It is the Company's objective to commence with drilling activities as soon as possible after the heritage survey has been concluded, and once all regulatory processes currently underway for the grant of tenement E47/4062 have been completed.

In parallel with the Andover South heritage survey, management are working to secure an additional survey over the Andover North project area (E47/3849, P47/2028, E47/4063 & E47/4603), which will allow the company to dual track a parallel exploration campaign over this area, which will hopefully lead to further definition of potential pegmatite mineralisation.
