## Commentary on Operations

### Tambomayo:

- Gold, lead and zinc production exceeded 1Q24 projections due to a change in mining sequence, prioritizing higher-margin prepared areas with higher gold, lead and zinc grades, partially offset by lower silver production.

### Orcopampa:

- 1Q24 gold production was in line with expectations.

### Coimolache:

- 1Q24 gold production was in line with expectations. Environmental permitting delays reduced available space on the leach pads, adversely impacting the volume of fresh ore which could be placed on the pad, as was previously announced.
- Silver production exceeded 1Q24 projections due to higher grade silver ore processed from the Tantahuatay NW-Ext, which was placed on the leach pad during 4Q23.

### Julcani:

- Silver and lead production was in line with expectations for 1Q24.

### Uchucchacua:

- Silver, lead and zinc in line with expectations for 1Q24.
- Uchucchacua production increased to an average 1,000 tpd during 1Q24 from 800 tpd reported during the 4Q23, aligned with the Company's plan to reach 1,500 tpd by the end of 2024.

### Yumpag:

- In January 2024, Yumpag successfully completed processing 124,600 tonnes of ore from its pilot stope.
- Yumpag received final operating permitting approval on March 18, 2024, enabling uninterrupted mining of up to 1,000 tons per day.
- Silver production exceeded 1Q24 projections as ore processing was initiated earlier than expected due to the operating permit approval. Processing had previously been expected to start during the 2Q24.

### El Brocal:

- Copper production was in line with expectations for 1Q24.
- Silver production exceeded 1Q24 projections due to higher than anticipated grades from the open pit's remaining stockpiled inventories. This was partially offset by lower than anticipated zinc grades during the quarter.
- As was previously reported, El Brocal's lead and zinc open pit mine has been placed under care and maintenance for up to three years until the Company receives the approval of the mine's Modification of Environmental Impact Assessment.
- El Brocal's 1Q24 underground mine exploitation rate reached 10,500 tpd, in line with the Company's target to reach 11,000 tpd by the end of 2024.

## Company Description
