FIRST QUARTER FINANCIAL RESULTS

Revenues generated during the quarter totaled \$106.0 million compared to \$157.0 million in the first quarter of 2023. The decrease in revenue was primarily attributable to a 37% decrease in the total number of payable AgEq ounces sold, resulting from the temporary suspension of mining activities at Jerritt Canyon in March 2023.

The Company realized an average price of \$23.72 per AgEq ounce during the first quarter, representing an 8% increase compared to the first quarter of 2023 and a 2% decrease compared to the prior quarter.

Operating cash flows before movements in working capital and taxes in the quarter was \$12.6 million compared to \$21.9 million in the first quarter of 2023.

The Company reported mine operating earnings of \$(0.3) million during the quarter compared to \$(6.4) million in the first quarter of 2023. The improvement in mine operating earnings was primarily attributed to a decrease in operating loss of \$29.7 million at Jerritt Canyon compared to the first quarter of 2023 following management's decision to temporarily suspend mining activities at Jerritt Canyon in March 2023.

Net earnings for the quarter amounted to \$(13.6) million (EPS of \$(0.05)) compared to \$(100.7) million (EPS of \$(0.37)) in the first quarter of 2023. Adjusted net earnings, normalized for non-cash or non-recurring items such as share-based payments, unrealized losses on marketable securities and non-recurring write-downs on mineral inventory for the quarter was \$(18.4) million (adjusted EPS of \$(0.06)) compared to \$0.9 million (adjusted EPS of \$0.00) in the first quarter of 2023.

As of March 31, 2024, the Company had a cash and restricted cash balance of \$229.3 million consisting of \$102.1 million of cash and cash equivalents and \$127.2 million of restricted cash.

(1) Jerritt Canyon was placed on temporary suspension in March 2023, in-circuit recovery efforts performed in Q1 2024 resulted in production of 647 gold ounces.

(2) See "Non-GAAP Financial Measures", below for further details of these measures.

Total production in the first quarter was 5.2 million AgEq ounces consisting of 2.0 million ounces of silver and 35,936 ounces of gold. The Company notes that silver and gold production is aligned with its 2024 guidance production plan and anticipates improvements in H2 2024 due to planned higher ore grades and throughput rates.

Cash cost for the quarter was \$15.00 per AgEq ounce, compared to \$13.01 per AgEq ounce in the previous quarter. The increase in cash costs per ounce was primarily attributable to a 22% decrease in AgEq production mainly from San Dimas in addition to the impact of the strengthening Mexican Peso. San Dimas production was impacted by reduced ore grades as mine sequencing transitioned from the Jessica and Victoria veins into the Roberta, Robertita and Elias vein systems. Additionally, ore flow and processing rates were impacted by slowdowns by union workers while negotiations on base pay, bonuses and headcount are ongoing and continuing into the second quarter. Management anticipates improved production and efficiencies in H2 2024 which is reflected in the current guidance plan.

AISC in the first quarter was \$21.53 per AgEq ounce compared to \$18.50 per AgEq ounce in the previous quarter. The 16% increase in AISC was primarily attributable to higher cash costs, lower production, and the continued strength of the Mexican Peso.

Total capital expenditures in the first quarter were \$28.2 million, consisting of \$13.3 million for underground development, \$9.9 million in exploration, and \$5.0 million in property, plant and equipment.
