"The Company has returned to profitability in the first quarter of 2024, in contrast to the net loss reported in Q3 2023 and Q4 2023. We had a slow start to Q1 2024, but ended the quarter very strongly in terms of top-line revenue and profitability. In Q1 2024, we were able to draw down on our new medium term facility to support rig purchases and other ancillary equipment for a new underground contract. We now have numerous multi-rig, multi-year contracts with tier one miners which will drive revenue and profits for years to come" said [Geodrill](#) Chief Financial Officer, Greg Borsk.

"Our focus on securing long-term contracts is pivotal for [Geodrill](#); strengthening our foothold in West Africa and important operational stability and a consistent revenue stream. This strategy is key for financial predictability allowing us to deliver on our commitments to our shareholders, reinforcing our commitment to sustainable growth and financial success," said Dave Harper, President of [Geodrill](#).

EBITDA does not have a standardized meaning prescribed by IFRS and therefore may not be comparable to similarly titled measures presented by other publicly traded companies, and EBITDA should not be construed as an alternative to other financial measures determined in accordance with IFRS.

Please see the Company's MD&A for the three month period ended March 31, 2024 for the EBITDA reconciliation.
