- generated revenue of \$2.2 million from the sale of 1,099 payable ounces of gold at an operating cash cost of \$1,667⁽¹⁾ per payable ounce, compared to \$1.9 million revenue in Q4 2023 at an operating cash cost of \$1,687 per payable ounce, representing a 16% increase in revenue; and
- closed the previously announced metal purchase and sale agreement with Empress Royalty Holding Corp. ("Empress"), a wholly-owned subsidiary of [Empress Royalty Corp.](#), under which the Company received an up-front cash payment of \$5 million for payable gold produced from the Galaxy mine. These funds are being invested in additional new mining equipment, refurbishment of existing mining equipment and working capital to accelerate underground development to access a second level at Galaxy to enable an increase in mining volumes to utilize the significant spare capacity in the processing plant.⁽²⁾

Golconda Gold CEO, Nick Brodie commented: "The first quarter of 2024 saw mining volumes and gold production increase over the fourth quarter of 2023. With the receipt of the funds received from the closing of the Empress Investment we should see production continuing to increase gradually over the next 12 months."⁽²⁾

After the quarter end we have taken delivery of one new drill rig, a loader and a dump truck, with additional equipment scheduled to arrive in late Q2 2024 and early Q3 2024.⁽²⁾ Work has also progressed well on the refurbishment of our existing mining fleet to improve equipment availabilities and to further develop the Galaxy and Princeton ore bodies to increase production. Post quarter end, we delivered our first ore to the plant from Princeton Top, a pre-developed mining area that we expect to provide immediate accretive production ounces."⁽²⁾
