

Torr Metals Inc. Featured in Syndicated Broadcast Covering Significant Increase in Sizing of Kolos Copper-Gold Project

31.05.2024 | [GlobeNewswire](#)

LOS ANGELES, May 31, 2024 - [Torr Metals Inc.](#) (TSX.V: TMET), a Canada-based company focused on advancing promising early-stage district-scale mineral properties, today announces that it has been featured in a broadcast via NetworkNewsAudio ("NNA"), a solution that delivers additional visibility, recognition and brand awareness in the investment community via distribution to thousands of syndication points. The audio news release covers TMET's announcement of a 75% increase in the size of its BC copper-gold project.

Torr Metals has significantly increased the size of its British-Columbia-based Kolos Copper-Gold Project by 75% from an approximate 140 km to 240 km. The company announced that new mineral claims focus on northern expansion, following an extension of the north-trending Fanta Fault, an orientation identified by the company as a major structural control on copper (Cu) and gold (Au) mineralization in the area.

"By securing these new claims at low cost, we've strategically expanded our footprint to include highly prospective ground to the east and north, incorporating the historical Ram soil anomaly as well as multiple new exploration targets," stated Torr Metals president and CEO Malcolm Dorsey. "While our main focus remains on the more advanced drill-ready Lodi, Kirby, Ace, Rea, and Clapperton Zones, the new discovery of the Vik Zone demonstrates the effectiveness of our exploration model in finding highly anomalous mineralization in unexplored areas. As such this expansion further enhances our long-term growth potential and places us in a favourable position for potential new grassroots discoveries in the upcoming 2024 field season."

About Torr Metals Inc.

Torr Metals is a Vancouver-based mineral exploration company focused on defining and developing the substantial exploration potential of the ~240-kilometer Kolos Copper-Gold Project, located within the prolific Quesnel Terrane in central British Columbia. Year-round access is provided by Highway 5, with the project being favorably located 23 kilometers north of the city of Merritt and 286 kilometers by highway from Vancouver, British Columbia.
