

Central Iron Ore Limited: Drilling Commences

14.06.2024 | [GlobeNewswire](#)

VANCOUVER, June 14, 2024 - [Central Iron Ore Ltd.](#) (CIO - TSX.V) ("CIO" or "the Company") is pleased to announce this Drilling Update.

Central Iron Ore is pleased to announce that the next phase of exploration activities at the British King Project in Western Australia has started on the June 8, 2024, with 39 Reverse Circulation ('RC') and 4 diamond holes scheduled to be completed over a 7-week campaign (Figure 1).

Figure 1. The sun sets after the first day's drilling of the 2024 RC campaign at British King (M37/30)

Highlights:

- Drilling has commenced on 39 RC drillholes for 3,538m that will further test and delineate the known auriferous lode along the length of the tenement at the British King mine (Figure 1).
- One of the key objectives of this drill programme is to increase the drill hole density across the British King primary lode and its multiple associated ancillary lodes to support further resource evaluation work. These targets have confirmed gold mineralisation that are laterally extensive and remain currently open at depth.
- Commencing in July, 200 metres of Diamond Drilling (4 drillholes) will test the primary British King lode. The diamond drillhole core will provide invaluable mineralogical and metallurgical samples.
