

Great Atlantic Thanks Gemological Institute of America (GIA) for Emerald-Related Research Visit

12.07.2024 | [Newsfile](#)

100% Owned South Quarry Tungsten Property, Newfoundland

Vancouver, July 12, 2024 - [Great Atlantic Resources Corp.](#) (TSXV: GR) (the "Company" or "Great Atlantic") is pleased to thank the Gemological Institute of America (GIA) and Rhiana Henry (a post-doctoral research fellow) for Rhiana's recent research visit to the Company's South Quarry Property, located in south-central Newfoundland. The visit focused on an area where Great Atlantic confirmed beryl crystals and is evaluating emerald potential.

Rhiana Henry visited the South Quarry Property on behalf of the GIA on July 3rd to meet Great Atlantic representatives and Art Gardiner (a well-known Newfoundland based prospector) and to collect rock samples as part of on-going emerald-related research. The visit was conducted in an area where the Company has sampled green beryl crystals for emerald potential evaluation. Emerald gemstone is a variety of the mineral beryl. Rhiana Henry is a post-doctoral research fellow who studies mineralogy and geology for gem purposes.

Great Atlantic's primary exploration focus at the South Quarry Property is tungsten. The Company confirmed tungsten mineralization in various regions of the property including high grade tungsten mineralization in

samples in the northern region of the property in the area of two quarries. Numerous 2015 Great Atlantic samples from these two quarries exceeded 1% WO3 (see Company news release of November 19, 2015).

The South Quarry Property consists of six mineral licences covering an area of 2,550 hectares, located in south-central Newfoundland. Access to the property is excellent with a paved road transecting the property.

David Martin, P.Geo. (New Brunswick and Newfoundland and Labrador), a Qualified Person as defined by NI 43-101 and VP Exploration for Great Atlantic, verified beryl crystals during 2015 and 2024 field work at the South Quarry Property.
