

Trailbreaker Resources Ltd. Initiates Multiple Geophysical Surveys at the Liberty Copper-Molybdenum Project

15.10.2024 | [GlobeNewswire](#)

[Trailbreaker Resources Ltd.](#) (TBK.V) ("Trailbreaker" or "the Company") is pleased to announce the mobilization of geophysical crews from Geotech Ltd. and Simcoe Geoscience Ltd. ("Simcoe") to conduct Z-axis Tipper Electromagnetic (ZTEM) and induced polarization (IP) surveys, respectively, at the Liberty copper (Cu) - molybdenum (Mo) project, in central British Columbia (BC).

The ZTEM survey is designed to provide property-wide resistivity and magnetic data up to a depth of 1,500 m. This will help define the geological, structural and alteration features of porphyry and skarn-style mineralization, of which previous grab samples assayed up to 23.71% Cu.

The IP survey is being conducted over the Cu-in-soil anomaly (see news release September 16, 2024) in order to define the extensions of historic chargeability and resistivity features that are coincident with Cu-Mo mineralization intersected during Trailbreaker's 2,442 m drill program conducted earlier this year (see news release dated July 22, 2024). The survey will utilize Simcoe's Alpha IP™ technology to survey up to 500+ m of depth, ensuring any deep sources of mineralization are detected.

Results and interpretation from both surveys are expected before the end of 2024.

Message from the President

"We are excited that these surveys have commenced at Liberty. The surveys extend deep below the overburden on the property. When these results are coupled with what we have learned from drilling, together with our property-wide geochemical survey and the high-grade Cu in rock samples, we expect it to produce a robust geological model to help vector and de-risk future drilling. This project is advancing quickly and in the right direction for a discovery." Daithi Mac Gearailt

Liberty Property Description

The 6,895-hectare Liberty Property is located approximately 60 km northwest of Quesnel, BC. The property is fully accessible by resource roads.

Drilling at Liberty has encountered widespread Cu-Mo porphyry-style mineralization at the northeastern margin of a property-scale Cu-in-soil geochemical anomaly. Mineralization is coincident with an Induced Polarization (IP) chargeability feature. However, historic IP surveying covered only a small portion of the much larger geochemical anomaly. Highlights of drill results include:

- LIB24-001 - 213.7 m of 0.16% CuEq from 248.3 m to the end of hole;
 - Including 13.5 m of 0.33% CuEq from 257.5 m;
 - And including 6.6 m of 0.67% CuEq from 300.9 m;

- LIB24-003 - 194.3 m of 0.16% CuEq from 256.0 m,
 - including 34.2 m of 0.47% CuEq from 385.0 m,
 - and including 5.9 m of 2.02% CuEq from 410.2 m;
- LIB24-004 - 226.0 m of 0.11% CuEq from 279.0 to the end of hole
 - Including 6.0 m of 0.45% CuEq from 431.0 m
 - And including 2.3 m of 0.36% CuEq from 500.0 m

Prospecting within the southwestern portion of the property-scale geochemical anomaly has defined an area of high-grade copper mineralization, with grab samples assaying up to 23.71% Cu.

For more information on this target see the Liberty Project webpage.

* Reported widths are drill width. Not enough geological information exists at this point to define true width. However, vein-hosted copper and molybdenum mineralization commonly occurs at high angles to core axis.

** Copper Equivalent formula used is:

$CuEq = Cu \text{ grade in } \% + (Mo \text{ grade in } \% * (Mo \text{ recovery}/Cu \text{ recovery}) * (Mo \text{ price}/lb * 2200 \text{ lb}) / (Cu \text{ price}/lb * 2200 \text{ lb})$ using copper price of US\$3.75/lb and molybdenum price of US\$25/lb. 100% metallurgical recoveries are assumed for both metals.

About Trailbreaker Resources

Trailbreaker Resources is a mining exploration company focused primarily on mining-friendly British Columbia and Yukon Territory, Canada. Trailbreaker is committed to continuous exploration and research, allowing maintenance of a portfolio of quality mineral properties which in turn provides value for shareholders. The company has an experienced management team with a proven track record as explorers and developers throughout the Yukon Territory, British Columbia, Alaska and Nevada.

ON BEHALF OF THE BOARD

Daithi Mac Gearailt
President and Chief Executive Officer

Carl Schulze, P. Geo., Consulting Geologist with Aurora Geosciences Ltd, is a qualified person as defined by National Instrument 43-101 for Trailbreaker's BC and Yukon exploration projects, and has reviewed and approved the technical information in this release.

Forward-Looking Statements

Statements contained in this news release that are not historical facts are "forward-looking information" or "forward-looking statements" (collectively, "Forward-Looking Information") within the meaning of applicable Canadian securities legislation and the United States Private Securities Litigation Reform Act of 1995. Forward-Looking Information includes, but is not limited to, disclosure regarding possible events, conditions or financial performance that is based on assumptions about future economic conditions and courses of action; expectations regarding future exploration and drilling programs and receipt of related permitting. In certain cases, Forward-Looking Information can be identified by the use of words and phrases such as

"anticipates", "expects", "understanding", "has agreed to" or variations of such words and phrases or statements that certain actions, events or results "would", "occur" or "be achieved". Although Trailbreaker has attempted to identify important factors that could affect Trailbreaker and may cause actual actions, events or results to differ materially from those described in Forward-Looking Information, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. In making the forward-looking statements in this news release, if any, Trailbreaker has applied several material assumptions, including the assumption that general business and economic conditions will not change in a materially adverse manner. There can be no assurance that Forward-Looking Information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on Forward-Looking Information. Except as required by law, Trailbreaker does not assume any obligation to release publicly any revisions to Forward-Looking Information contained in this news release to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.
