

# Global Energy Metals CEO to Host Fireside Chat with Dan Blondal, Founder of Nano One Materials, at Upcoming Battery Metals Association of Canada Charged!

24.10.2024 | [The Newswire](#)

## 2024 Battery Conference

Vancouver, October 24, 2024 - [Global Energy Metals Corp.](#) (TSXV:GEMC | OTCQB:GBLEF | FSE:5GE1) ("Global Energy Metals", the "Company" and/or "GEMC"), a multi-jurisdictional, multi-commodity critical mineral exploration, development and project generating company focused on growth-oriented projects supporting the global transition to clean energy, is pleased to announce that Chief Executive Officer, Mitchell Smith, will moderate a fireside chat at the upcoming Battery Metals Association of Canada CHARGED! 2024 Battery Conference ("CHARGED! 2024") being held in Calgary, Alberta on October 29th and 30th.

Smith, who is also a Director for the Battery Metals Association of Canada, will host Dan Blondal, CEO, Director and Founder of Nano One Materials Corp., for a fireside chat: "The Innovation Pathway - Emerging Industry Requirements". This session will look at what it takes to move from project innovation to commercialization, exploring some of the challenges, opportunities, supports and key partnerships that can foster success. Nano One is a clean technology company with a patented process for the low-cost, low-GHG production of lithium-ion battery cathode active materials. Blondal and team have been successful in attracting strategic partnerships and growth capital having recently been awarded USD \$12.9 million (~CAD \$17.8 million) by the Department of Defense (DoD) of the United States of America through the Defense Production Act Investments (DPAI) office's Title III program.

CHARGED! 2024 brings together industry leaders and experts to discuss Canada's pivotal role in leading the global energy transition. The conference has a strong program with industry, government and investment focused attendees which is intended to highlight the nation's successes, addressing challenges, and examines the trends that establish Canada as a key player in the energy sector's evolution.

Global Energy Metals extends an invitation to register for the event and be part of the conversations that will shape the future of critical minerals in Canada. Information can be found on the BMAC website, linked here, or by direct email to Alexandra Fischer ([alexandra@bmacanada.org](mailto:alexandra@bmacanada.org)) or Sean DeVries ([sean@bmacanada.org](mailto:sean@bmacanada.org)).

## About The Battery Metals Association of Canada

The Battery Metals Association of Canada (BMAC) is a trade organization of entrepreneurs, explorers, developers and producers of battery metals and materials, who have joined together to support a rapidly changing energy landscape. What is shared is a desire to develop battery metals resources and to incorporate these materials into a battery production stream. As a national non-profit association, BMAC will connect the industry and lead the effort to ensure Canada fully captures the abundant economic potential of its massive resources through the responsible and sustainable growth of Canada's battery metals supply chain.

(TSXV:GEMC | OTCQB:GBLEF | FSE:5GE1)

Global Energy Metals Corp. offers investment exposure to the growing rechargeable battery and electric vehicle market by building a diversified global portfolio of exploration and growth-stage battery mineral assets.

Global Energy Metals recognizes that the proliferation and growth of the electrified economy in the coming decades is underpinned by the availability of battery metals, including cobalt, nickel, copper, lithium and other raw materials. To be part of the solution and respond to this electrification movement, Global Energy Metals has taken a 'consolidate, partner and invest' approach and in doing so have assembled and are advancing a portfolio of strategically significant investments in battery metal resources.

As demonstrated with the Company's current copper, nickel and cobalt projects in Canada, Australia, Norway and the United States, GEMC is investing-in, exploring and developing prospective, scaleable assets in established mining and processing jurisdictions in close proximity to end-use markets. Global Energy Metals is targeting projects with low logistics and processing risks, so that they can be fast tracked to enter the supply chain in this cycle. The Company is also collaborating with industry peers to strengthen its exposure to these critical commodities and the associated technologies required for a cleaner future.

Securing exposure to these critical minerals powering the eMobility revolution is a generational investment opportunity. Global Energy Metals believes Now is the Time to be part of this electrification movement.

Cautionary Statement on Forward-Looking Information:

Certain information in this release may constitute forward-looking statements under applicable securities laws and necessarily involve risks associated with regulatory approvals and timelines. Although Global Energy Metals believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Except as required by law, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.

GEMC's operations could be significantly adversely affected by the effects of a widespread global outbreak of a contagious disease, including the recent outbreak of illness caused by COVID-19. It is not possible to accurately predict the impact COVID-19 will have on operations and the ability of others to meet their obligations, including uncertainties relating to the ultimate geographic spread of the virus, the severity of the disease, the duration of the outbreak, and the length of travel and quarantine restrictions imposed by governments of affected countries. In addition, a significant outbreak of contagious diseases in the human population could result in a widespread health crisis that could adversely affect the economies and financial

markets of many countries, resulting in an economic downturn that could further affect operations and the ability to finance its operations.
