

Ellis Martin Report: Power Nickel Inc.: Lion Zone Discovery Roars Again! 19.6 Metres @ 3.82% Copper Equivalent

12.11.2024 | [ABN Newswire](#)

Malibu, CA, United States - In this segment of The Ellis Martin Report and Money Talk Radio we speak with Terry Lynch, CEO of Power Nickel (CVE:PNPN) (OTCMKTS:PNPNF).

Hole 72 delivers 19.60 metres with 3.82% CuEq 19.60 m of 1.27 g/t Au, 20.30 g/t Ag, 2.53 % Cu, 1.01 g/t Pd, 2.42 g/t Pt and 0.15% Ni.

[Power Nickel Inc.](#) (CVE:PNPN) (OTCMKTS:PNPNF) (FRA:IVV) is pleased to announce the third set of assay results obtained for two more holes of the summer 2024 drilling campaign at its polymetallic Lion Zone discovery.

"The summer of 2024 will be remembered as an epic one regarding ongoing discovery of the Lion Zone. The westward expansion has continued to produce some fantastic results. Following up 32 metres of almost 7% CuEq with almost 40 metres of 4.19% CuEq, Hole 72 provides a continuation of our track record of success. As we push west, we are learning more about the mineralized zone and how it behaves, and our ability to track and anticipate the zone is improving. We are now routinely using downhole EM in all our new holes, giving our exploration team insight into a radius of about 200 metres. While the summer drilling program was done on a smaller 50 metre fan drilling approach, the fall and winter programs are successfully drilling 150 plus metres step outs with this technique. Look for more roars from our Lion Zone soon," commented Terry Lynch, CEO of Power Nickel.

About Power Nickel Inc.:

Power Nickel Inc. (CVE:PNPN) (OTCMKTS:PNPNF) (FRA:IVV) is a Canadian junior exploration company focusing on developing the High-Grade Nisk project into Canada's first Carbon Neutral Nickel mine.

On February 1, 2021, Power Nickel (then called Chilean Metals) completed the acquisition of its option to acquire up to 80% of the Nisk project from [Critical Elements Lithium Corp.](#) (CVE:CRE). Subsequently, Power Nickel has exercised its option to acquire 50% of the Nisk Project and delivered notice to Critical Elements that it intends to exercise its second option to bring its ownership to 80%. The last remaining commitment to exercise the option was the delivery of a NI-43-101 Technical report which has now occurred.

The Nisk property comprises a significant land position (20 kilometers of strike length) with numerous high-grade intercepts. Power Nickel is focused on expanding the historical high-grade nickel-copper PGE mineralization with a series of drill programs designed to test the initial Nisk discovery zone and to explore the land package for adjacent potential Nickel deposits.

In addition to the Nisk project, Power Nickel owns significant land packages in British Columbia and Chile. Power Nickel is expected to reorganize these assets in a related vehicle through a plan of arrangement.

Power Nickel announced on June 8, 2021, that an agreement had been made to complete the 100% acquisition of its Golden Ivan project in the heart of the Golden Triangle. The Golden Triangle has reported mineral resources (past production and current resources) in 130 million ounces of gold, 800 million ounces of silver, and 40 billion pounds of copper (Resource World). This property hosts two known mineral showings (gold ore and Magee) and a portion of the past-producing Silverado mine, reportedly exploited between 1921 and 1939. These mineral showings are Polymetallic veins containing quantities of silver, lead, zinc, plus/minus gold,

About The Ellis Martin Report:

The Ellis Martin Report (TEMR) is an internet based radio program showcasing potentially undervalued

companies to an audience of potential retail investors and fund managers that comprise our listening audience. TEMR is broadcasted on the VoiceAmerica Business Channel and The Opportunity Radio Network. CEO and company interviews are paid for by those represented on the program.
