

# Primary Hydrogen Corp. Announces Launch of New Website

14.11.2024 | [Newsfile](#)

Vancouver, Nov. 14, 2024 - [Primary Hydrogen Corp.](#) (TSXV: HDRO) ("PrimaryH2" or the "Company"), a premier natural hydrogen exploration company, is pleased to announce the launch of its newly designed website ([www.primaryh2.com](http://www.primaryh2.com)) and investor presentation, showcasing the potential of naturally-occurring hydrogen and the Company's Blakelock project.

"The launch of our new website and investor presentation marks the completion of our rebranding efforts towards natural hydrogen exploration," commented Benjamin Asuncion, CEO of Primary Hydrogen. "With the completion of our \$3 million capital raise, the Company is well financed to advance exploration on its wholly owned Blakelock project in addition to continuously evaluating opportunities and seeking to build an organic project portfolio."

## The Potential of Natural Hydrogen

Hydrogen has the potential to significantly reduce greenhouse gas emissions, allowing companies and countries alike to attain stated emission reduction mandates. The majority of hydrogen production currently comes from steam-methane reforming, which relies on the use of fossil fuels, and electrolysis, which is energy intensive and high cost. The potential to discover, develop, and operate sources of naturally-occurring hydrogen presents a compelling opportunity as it represents a potentially low-cost<sup>1</sup>, renewable source of this clean-burning fuel. The applications for expanded hydrogen use are numerous including transportation (either used in fuel cells or as a direct fuel source such as ammonia), heat and power (such as blending into the natural gas grid) as well as direct feedstock for other industries (such as oil sands upgrading and decarbonizing steel manufacturing).

About Primary Hydrogen Corp.

Primary Hydrogen Corp. is a mineral exploration company currently focused on its Blakelock hydrogen project in Ontario and Arthur Lake Copper project in British Columbia. The Blakelock Hydrogen Project is comprised of 109 mineral claims covering 2,207 hectares in the Larder Lake Mining Division of Northern Ontario. The Arthur Lake Copper Project is comprised of 1,050 hectares near Vanderhoof, British Columbia.
