

StrategX Provides Update on Critical Metals Exploration Activities at the Nagvaak Project, Nunavut, Canada

03.12.2024 | [Newsfile](#)

Vancouver, December 3, 2024 - [StrategX Elements Corp.](#) (CSE: STGX) ("StrategX" or the "Company") has mobilized and established key logistics for its 2025 exploration program at the Nagvaak Project ("Nagvaak"). Nagvaak represents a geological discovery with the potential to delineate a significant critical metals deposit on the Melville Peninsula. New regional exploration efforts and recently analyzed data have also highlighted a series of additional prospective targets.

Key Developments:

- **New Regional Targets Identified:** Recent surface exploration efforts have identified additional critical metals targets (copper, nickel, vanadium, cobalt and graphite) within a 200 km by 100 km area in the same sedimentary belt hosting Nagvaak, showcasing the region's substantial untapped potential. (See Figure 1.)
- **Drill Site & Base Camp:** The Company has successfully positioned a drill rig at the first priority target site and completed the establishment of a base camp to support the 2025 drill campaign at Nagvaak. (See Figure 2.)
- **Supply Chain Established:** Three container shipments of equipment and materials were delivered to the Melville Peninsula in September and October, ensuring a robust inventory to support future exploration activities.
- **Community Engagement:** StrategX continues fostering strong relationships with local communities, prioritizing local employment and partnering with an Inuit-owned company to manage the camp and provide logistical support.
- **Operational Planning:** Final preparations are underway to secure contractors for the 2025 exploration program, utilizing innovative and cost-effective approaches to maximize operational efficiency and extend the exploration season.

StrategX is focused on advancing Nagvaak as its flagship project, aiming to define a world-class critical metals deposit in Canada. With the summer financing having raised \$4.5 million (see StrategX news release June 25th, 2024), the Company is well positioned to achieve its objectives, supporting both the global green energy transition and national supply chain security.

The establishment of a field base camp on the Melville Peninsula (see Figure 3.) is essential to support the success of future exploration programs developing a new critical metals province in Canada. This underexplored region exhibits geological similarities to other Proterozoic sedimentary belts hosting large-scale critical mineral deposits, providing a strong foundation for future discoveries.

StrategX filed its third-quarter results on November 29th, 2024, on SEDAR.

About StrategX

StrategX is an exploration company focused on discovering critical metal deposits in Canada. With five strategic projects situated on the East Arm of the Great Slave Lake in the Northwest Territories and on the Melville Peninsula in Nunavut, we are pioneering exploration discoveries in these untapped regions. By integrating historical exploration data and applying innovative exploration methodology, StrategX is offering investors a unique opportunity to be part of multiple discoveries of new critical metal districts. These important metals are essential for supporting the global green energy transition and national supply chain security. For the latest updates and insights, visit our Investor Portal.
