

# Precipitate Gold Corp. Constructs New Access Road at Southeast Zone of the Juan de Herrera Project

14.01.2025 | [The Newswire](#)

[Precipitate Gold Corp.](#) (the "Company" or "Precipitate") (TSXV: PRG, OTCQB: PREIF) is pleased to announce equipment has been mobilized to construct and upgrade access roads within the southern region of the Company's 100% owned Juan de Herrera Project ("Juan de Herrera" and the "Project") in the Dominican Republic. See accompanying video and photos below.

The roads are being constructed and upgraded in advance of future work in and around the Southeast Zone to improve access to multiple highly prospective areas within the southern project region where previous results have yielded rock sample results up to 13.5% copper\*, and a continuous rock chip (trench) sample reported 3.0 metres ('m') of 2.78% copper, within 8.0m of 1.28% copper, within a broader 18.0m of 0.70% copper. The construction of these access routes will streamline future mobilization of crews and equipment and aid in facilitating follow up exploration and advancement of several promising underexplored target areas. The equipment and personnel utilized in this initiative were sourced from nearby communities and conducted in full collaboration with various local stakeholders.

Jeffrey Wilson, Precipitate's President and CEO stated, "We are pleased to commence this work within an emerging region of the Juan de Herrera project. The newly constructed access routes will not only enhance our exploration capabilities for future and ongoing exploration but provide substantial benefits to the local communities by opening and improving previously challenged and inoperable local infrastructure for improved public use. This initiative, carried out in concert with local groups and using locally sourced road construction equipment, underscores our commitment to responsible exploration through collaborative community partnerships."

#### About the Juan de Herrera Project:

The Juan de Herrera Project is owned 100% by Precipitate Gold Corp. and comprised of approximately 12,706 hectares located immediately adjacent to GoldQuest Mining's Romero gold-copper project within the Upper Cretaceous aged package of volcanic and sedimentary Tiroo Gold Formation in San Juan Province of Dominican Republic. The project hosts intermediate sulphidation epithermal and VMS style exploration targets. Work to date, including extensive project wide geochemical and geophysical surveying and limited diamond drilling, has delineated and outlined multiple anomalous zones of gold and/or copper mineralization warranting additional exploration and drilling. Approximately 5.0 million gold equivalent ounces have been discovered and advanced in the Tiroo Formation belt in the last decade, while vast areas of similarly prospective and proximal terrain, such as that situated within Precipitate's Juan de Herrera project, remain largely underexplored.

#### About Precipitate Gold:

Precipitate Gold Corp. is a mineral exploration company focused on exploring and advancing its mineral property interests in the Pueblo Viejo Mining Camp and Tiroo Gold Trend of the Dominican Republic. The Company has entered into an Earn-In Agreement with [Barrick Gold Corp.](#), whereby Barrick can earn a 70% interest in the Company's Pueblo Grande Project by incurring US\$22M within 10 years and producing a qualifying Pre-feasibility Study. Precipitate is also actively evaluating additional high-impact property acquisitions with the potential to expand the Company's portfolio and increase shareholder value, in other favourable jurisdictions.

This press release may contain "forward-looking information" within the meaning of applicable Canadian securities legislation. All statements, other than statements of historical fact, included herein are forward looking information. Generally, forward-looking information may be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "proposed", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases, or by the use of words or phrases which state that certain actions, events or results may, could, would, or might occur or be achieved. This forward-looking information reflects Precipitate Gold Corp.'s ("Precipitate" or the "Company") current beliefs and is based on information currently available to Company and on assumptions it believes are reasonable. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Precipitate to be materially different from those expressed

or implied by such forward-looking information. Such risks and other factors may include, but are not limited to: the exploration concessions may not be granted on terms acceptable to the Company, or at all; general business, economic, competitive, political and social uncertainties; the concessions acquired by the Company may not have attributes similar to those of surrounding properties; delay or failure to receive governmental or regulatory approvals; changes in legislation, including environmental legislation affecting mining; timing and availability of external financing on acceptable terms; conclusions of economic evaluations; and lack of qualified, skilled labour or loss of key individuals. Although Precipitate has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. Accordingly, readers should not place undue reliance on forward-looking information. Precipitate does not undertake to update any forward-looking information, except in accordance with applicable securities laws.
