

Canadian Critical Minerals Inc. Generates USD\$167,000 in Revenue from Bull River Mine

28.01.2025 | [Newsfile](#)

[Canadian Critical Minerals Inc.](#) (TSXV: CCMI) (OTCQB: RIINF) ("CCMI" or the "Company") is pleased to report revenues for the Company from the sale of stockpiled copper, gold and silver mineralized material at the Bull River Mine ("BRM") project near Cranbrook, BC. During the month of December 2024, the Company trucked 424 dry metric tonnes ("dmt") of sorted mineralized material to New Afton and the Company received a provisional payment of approximately USD\$167,000 for the December 2024 shipments. The mineralized material sent to New Afton graded 5.43% Cu, 0.80 g/t Au and 59.2 g/t Ag.

Ore sorting throughput was adversely affected by winter conditions and vacations for BRM employees and contract truckers over the holiday period, resulting in less material produced for shipment and delivered to New Afton. However, grades for copper, gold and silver were the highest yet achieved through sorting operations. To-date, the Company has shipped approximately 6,255 tonnes of mineralized material to New Afton under the Ore Purchase Agreement ("OPA"). Shipped material includes 5,055 tonnes of sorted material and 1,200 tonnes of unsorted fines. Rejects from the sorting process continue to grade between 0.4% Cu and 1.0% Cu, hence, they can be economically processed in future at the BRM once the Company has received permission to restart the mill. Additionally, the Company has stockpiled approximately 60,000 tonnes of fine material that is too fine to be sent to the sorter. Fine material is expected to grade at 1.39% copper, 0.29 g/t gold and 11 g/t silver representing the average run of mine material in the original surface stockpile.

Ian Berzins, President and CEO of CCMI commented, "While the total tonnes sent to New Afton during December 2024 were lower than planned, we did achieve the highest grades yet for ore sorting at the Bull River Mine."
