

Central Petroleum Limited: Quarterly Activities Report

01.02.2025 | [ABN Newswire](#)

Brisbane, Australia - [Central Petroleum Ltd.](#)'s (ASX:CTP) (FRA:C9J) (OTCMKTS:CNPTF) gas fields were operating at full capacity for much of the quarter.

Demand for gas in the Northern Territory was consistently strong during the quarter as warmer temperatures drove increased energy consumption.

Production at Mereenie was interrupted for several days while pipeline connections for the two new wells were installed.

Sales volumes increased 3% to 1.17 PJe (Central share) from the previous quarter which was impacted by brief turndowns due to seasonal demand fluctuations and pipeline maintenance.

The benefit of switching supply solely to NT customers after the closure of the Northern Gas Pipeline (NGP) early in 2024 was evident, as sales volumes in the six months to December, at 2.3 PJ, were 10% higher than the preceding June half year and 5% lower than the previous December half year due to brief turndowns in July and August and natural field decline.

SALES REVENUE

Revenue for the quarter was \$9.4 million, up 4.6% on the prior quarter, reflecting the increased production and marginally higher gas prices. The average portfolio price increased 1.2% to \$8.01 / GJe.

Half year sales revenue was \$18.3 million, 4% higher than the December 2023 quarter as higher gas prices more than offset the lower volumes.

A further \$0.2 million of revenue was recognised from the release of deferred take-or-pay balances as these volumes are unlikely to be delivered under take-or-pay contracts. \$0.5 million was recognised for the half year to December.

The revenue impacts of new NT contracts commencing 1 January 2025, commencement of WM29 well in January and the commencement of WM30 well anticipated by early March should start to become visible in the March 2025 quarter.
