

Eskay Mining 2025 Prospecting and Mapping Program Geared to Advance Two High-Value Targets to Drill Readiness

20.02.2025 | [ACCESS Newswire](#)

TORONTO, February 20, 2025 - [Eskay Mining Corp.](#) ("Eskay" or the "Company")(TSXV:ESK)(OTC PINK:ESKYF)(Frankfurt:KN7)(WKN:OYDPM) is pleased to announce its 2025 prospecting and mapping program at two high-value targets, the TV Zone and the C10-Vermillion-Ted Morris (TM) trend. This work is expected to bring both targets to drill readiness with the possibility of executing a limited drill campaign this coming season.

Mac Balkam C.E.O. & President commented "Our 2024 prospecting program was commissioned to establish a short list of high-value targets for follow up work in 2025. Assay results from 2024 prospecting surpassed expectations, and in particular, revealed high-grade outcrop gold and silver results along a 4km stretch of the C10-Vermillion-Ted Morris trend now considered a very promising prospective drill target. Our initial drilling success from 2020 through 2022 at TV revealed a high-grade gold stockwork feeder for a VMS system. We remain convinced that locating the seafloor position above this will lead to a major VMS discovery."

In early July, 2025, Eskay's team will continue prospecting along the 4 km C10-Vermillion-Ted Morris trend to follow up on the 2024 discovery of numerous high-grade quartz-carbonate-sulfide veins and stockwork veining in shear zones. Sampling here yielded Au and Ag grades as high as 205gpt and 371gpt, respectively. At C10-Vermillion, copper accompanies gold and silver suggesting the possibility that these veins may be rooted in a porphyry at depth. Results from Ted Morris are similar to those at C10-Vermillion but with less copper. Encouragingly, a sequence of flat stacked veins was discovered at Ted Morris. See link for 2024 Prospecting Results <https://eskaymining.com/news/news-releases/eskay-minings-boots-on-the-ground-campaign-yiel-9576>.

Eskay Mining believes its 2025 campaign including possible drilling of these high-value targets could lead to a significant discovery. The C10-Vermillion-Ted Morris trend situated in the southern part of the Consolidated Eskay Property lies approximately 9 km due west of Newmont's Valley of the Kings mine purchased in 2021 for \$2.8 Billion U.S.

Eskay's exploration team will return to the TV Zone for a 5th season in pursuit of "Eskay II." To date, TV is primarily and extensive high-grade VMS stockwork. The proper seafloor position where a VMS deposit might reside has yet to be discovered and remains an important target. Balkam re-enforced "we believe locating the seafloor at TV could result in a discovery like the 21B zone that lead to the discovery of the prolific Eskay Mine. We hope to make our own "hole 109" discovery."

Dr. Quinton Hennigh, P. Geo., a Director of the Company and its technical adviser, a qualified person as defined by National Instrument 43-101, has reviewed and approved the technical contents of this news release.

Eskay Mining Corp (TSXV:ESK) is a TSX Venture Exchange listed company, headquartered in Toronto, Ontario. Eskay is an exploration company focused on the exploration and development of precious and base metals along the Eskay rift in a highly prolific region of northwest British Columbia known as the "Golden Triangle," 70km northwest of Stewart, BC. The Company currently holds mineral tenures in this area comprised of 177 claims (52,600 hectares).
