

Global Uranium Corp. Signs Letter of Engagement with Big Rock Exploration to Advance Phase II Exploration at the Wyoming Group of Projects

06.03.2025 | [GlobeNewswire](#)

CALGARY, March 06, 2025 - [Global Uranium Corp.](#) (CSE: GURN | OTC: GURFF | FRA: Q3J) (the "Company") is pleased to announce that it has signed a Letter of Engagement ("LOE") with Big Rock Exploration LLC ("BRE") to commence Phase II exploration activities on the Company's Wyoming Group of Projects. The engagement with BRE represents the next step forward in refining exploration targets across the Airline, Jeep, WAC, Big Bend, and Jabs properties, located in key uranium districts within Wyoming.

Under the terms of the engagement, BRE will develop an exploration framework by integrating historical data, geologic mapping, and radiometric survey results to identify high-priority drill targets. This initiative builds upon the successful completion of Phase I, which involved GIS data compilation, historical data review, and permitting assessments. Phase II will focus on further delineating uranium-bearing formations, improving project-level understanding, and preparing for subsequent fieldwork.

"We are excited to continue advancing our Wyoming uranium assets with the support of Big Rock Exploration," stated Ungad Chadda, CEO of Global Uranium. "Their technical expertise and systematic approach to target development align well with our exploration objectives, as we work towards testing for economically viable uranium mineralization within our claim holdings."

In addition to advancing the Wyoming assets, Global Uranium and Forum Energy are continuing to ramp up activities at the Northwest Athabasca (NWA) Joint Venture Project in northern Saskatchewan. Mobilization efforts are progressing, with core infrastructure recently delivered to the project site. Camp construction is well underway, and the final preparations for drilling are being completed. Geological teams are expected to arrive on-site by the end of the month to finalize drill pad layouts, assess terrain conditions, and prepare for drilling operations. Initial geophysical surveys are scheduled to begin in early March, with drilling expected to commence shortly thereafter. The first drill holes are planned to focus on previously identified high-priority targets within Zone 2A, leveraging existing road access for logistical efficiency.

Global Uranium remains committed to executing its exploration strategy across both the Wyoming and NWA projects. Further updates will be provided as exploration activities progress.

Qualified Person

Jared Suchan, Ph.D., P.Geo., Global Uranium's Vice President of Exploration and Qualified Person under National Instrument 43-101, has reviewed and approved the contents of this news release.

About Global Uranium Corp.

Global Uranium Corp. focuses on exploring and developing uranium assets primarily in North America. The Company currently holds key uranium projects: the Wing Lake Property in the Mudjatik Domain of Northern Saskatchewan, Canada; the Northwest Athabasca Joint Venture with [Forum Energy Metals Corp.](#) and [NexGen Energy Ltd.](#) in the Northwest Athabasca region of Saskatchewan, Canada; and the Great Divide Basin District Projects, the Gas Hills District Projects, and the Copper Mountain District Projects in Wyoming, USA.

Forward-Looking Statements

Certain statements contained in this press release constitute forward-looking information. These statements relate to future events or future performance. The use of any of the words "could", "intend", "expect", "believe", "will", "projected", "estimated" and similar expressions and statements relating to matters that are not historical facts are intended to identify forward-looking information and are based on the Company's current belief or assumptions as to the outcome and timing of such future events. In particular, this press release contains forward-looking information relating to, among other things, the intention to continue exploration efforts on the Project with the aim of further unlocking the Project's potential; and the expectation that natural attenuation will allow the site to recover without further action.

Although forward-looking information is based on the reasonable assumptions of the Company's management, there can be no assurance that any forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include the risk that exploration of the Project may not continue, whether as a result of a lack of financial resources, a failure to receive the requisite permits or approvals, the discretion of management of the joint venture or otherwise; the risk that exploration of the Project will not progress as currently contemplated and, that, even if exploration does proceed as anticipated, such exploration activities may not achieve their anticipated outcomes; risks inherent in the exploration and development of mineral projects, including risks relating to receiving requisite permits and approvals, changes in project parameters or delays as plans continue to be redefined, that mineral exploration is inherently uncertain and that the results of mineral exploration may not be indicative of the actual geology or mineralization of a project; the risk that mineral exploration may be unsuccessful or fail to achieve the results anticipated by the Company; risks related to joint ventures and the other risks and factors identified by the Company in its continuous disclosure filings, filed on the Company's SEDAR+ profile at www.sedarplus.ca.

The forward-looking information contained in this release is made as of the date hereof, and the Company is not obligated to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable securities laws. Because of the risks, uncertainties and assumptions contained herein, investors should not place undue reliance on forward-looking information. The foregoing statements expressly qualify any forward-looking information contained herein.

The Canadian Securities Exchange has not reviewed, approved, or disapproved the contents of this ?press release.
