From Ezra Jacob, Chairman and Chief Executive Officer

"EOG had a strong start to the year, with oil and total volumes, cash operating costs, and DD&A better than expected. This was driven by solid execution across both foundational and emerging plays.

"The company's financial position provides EOG the ability to return greater than 100% of annual free cash flow in the next 12 months. Strong operating results generated \$1.3 billion of free cash flow in the quarter. EOG returned \$1.3 billion to shareholders through \$538 million in regular dividends and \$788 million of share repurchases.

"Significant progress in the company's exploration efforts complements positive operational developments across our portfolio. Recent exploration success in Trinidad, continued cost reduction and resource additions in foundational assets, improved operating efficiency and productivity improvements in emerging plays, provide high confidence in the low-cost basis and strength of our resource base.

"We adjusted our plan for the year to optimize capital investment. The focus remains on capital discipline, such that we can balance both macro and operational considerations to drive returns, strong free cash flow and continued improvement in EOG's low-cost position supports profitability during periods of price volatility, allowing the company to create significant shareholder value through commodity price cycles."

#### Regular Dividend and First Quarter Share Repurchases

The Board of Directors today declared a dividend of \$0.975 per share on EOG's common stock. The dividend will be paid on August 1, 2025, to stockholders of record as of July 17, 2025. The indicated annual rate is \$3.90 per share.

During the first quarter, the company repurchased 6.2 million shares for \$788 million under its share repurchase authorization. The company has \$5.1 billion remaining on its current share buyback authorization.

#### 2025 Capital Plan Update & Other Highlights

#### 2025 Capital Plan Update

In light of our strong first quarter performance and potential near-term impacts on global demand due to ongoing discussion on trade tariffs, we are proactively optimizing our full-year 2025 plan. Total capital expenditures for 2025 are now expected to range from \$5.2 billion to \$6.2 billion, a \$200 million reduction relative to our prior plan. As a result, the company expects to maintain oil production at first quarter 2025 levels for the balance of the year and deliver full-year oil production growth of 2% and total production growth of 3%.

#### EOG Exploration Update

EOG has announced a shallow water offshore oil discovery in Trinidad. The Beryl oil discovery is based on a successful test well in the TSP Deep Area.

#### First Quarter 2025 Financial Performance

##### Prices

- Crude oil, NGL and natural gas prices increased in 1Q compared with 4Q

##### Volumes

- Oil production of 502,100 Bopd was above the midpoint of the guidance range and up from 4Q
- NGL production was above the midpoint of the guidance range and down from 4Q
- Natural gas production was above the midpoint of the guidance range and down from 4Q
- Total company equivalent production was above the midpoint of the guidance range and down from 4Q

##### Per-Unit Costs

- LOE, GP&T, and DD&A expenses increased in 1Q compared with 4Q, while G&A costs decreased

##### Hedges

- Mark-to-market hedge losses decreased GAAP earnings per share in 1Q compared with 4Q
- Cash paid to settle hedges decreased adjusted non-GAAP earnings per share in 1Q compared with 4Q

##### Free Cash Flow

- Cash flow from operations before changes in working capital was \$2.8 billion
- Incurred \$1.5 billion of capital expenditures
- This resulted in \$1.3 billion of free cash flow

##### Cash Return and Working Capital

- Paid \$538 million in regular dividends
- Repurchased \$788 million of stock
- Paid approximately \$700 million in taxes associated with postponed tax payments due to severe weather tax relief

#### First Quarter 2025 Operating Performance

##### Lease and Well

- QoQ: Increased primarily due to higher water handling expenses and fuel costs
- Guidance Midpoint: Lower primarily due to lower workover expenses and labor costs

##### Gathering, Processing and Transportation Costs

- QoQ: Increased primarily due to higher gas transportation expenses and fuel costs
- Guidance Midpoint: Lower primarily due to lower compression-related costs

##### General and Administrative

- QoQ: Decreased due to lower employee-related expenses
- Guidance Midpoint: Lower due to lower employee-related expenses

Depreciation, Depletion and Amortization

- QoQ: Increased primarily due to the impact of reserve revisions and well mix
- Guidance Midpoint: Lower primarily due to the addition of lower cost reserves

## Endnotes

- 1) Cash Operating Costs consist of LOE, GP&T and G&A. TOTI (% of revenues from sales of crude oil and condensate, NGLs and natural gas) (non-GAAP) and G&A (non-GAAP) for each of 3Q 2024, fiscal year 2024 and fiscal year 2022 exclude a state severance tax refund and related consulting fees, respectively, as reflected in the accompanying reconciliation schedules (see "Revenues, Costs and Margins Per Barrel of Oil Equivalent"). The per-Boe impact of such consulting fees on G&A and total Cash Operating Costs for 3Q 2024, fiscal year 2024 and fiscal year 2022 was \$(0.10), \$(0.02) and \$(0.05), respectively, as set forth in "First Quarter 2025 Results vs Guidance" and "Second Quarter and Full-Year 2025 Guidance" above.
- 2) Includes gathering, processing and marketing revenue, gains (losses) on asset dispositions (for GAAP earnings per share only), other revenue, exploration, dry hole, impairments and marketing costs, taxes other than income, other income, interest expense and the impact of changes in the effective income tax rate.
- 3) Effective January 1, 2024, EOG combined Transportation Costs and Gathering and Processing Costs into one line item titled Gathering, Processing and Transportation Costs. This presentation has been conformed for all periods presented and had no impact on previously reported Net Income.
- 4) EOG bases United States and Trinidad crude oil and condensate price differentials upon the West Texas Intermediate crude oil price at Cushing, Oklahoma, using the simple average of the NYMEX settlement prices for each trading day within the applicable calendar month.
- 5) EOG bases United States natural gas price differentials upon the natural gas price at Henry Hub, Louisiana, using the NYMEX Last Day Settle price for each of the applicable months.
- 6) In general, EOG excludes impairments which are (i) attributable to declines in commodity prices, (ii) related to sales of certain oil and gas properties or (iii) the result of certain other events or decisions (e.g., a periodic review of EOG's oil and gas properties or other assets). EOG believes excluding these impairments from total impairment costs is appropriate and provides useful information to investors, as such impairments were caused by factors outside of EOG's control (versus, for example, impairments that are due to EOG's proved oil and gas properties not being as productive as it originally estimated).
- 7) The forecast items for the second quarter and full year 2025 set forth above for EOG are based on currently available information and expectations as of the date of this press release. EOG undertakes no obligation, other than as required by applicable law, to update or revise this forecast, whether as a result of new information, subsequent events, anticipated or unanticipated circumstances or otherwise. This forecast, which should be read in conjunction with this press release and EOG's related Current Report on Form 8-K filing, replaces and supersedes any previously issued guidance or forecast.
- 8) The full-year 2022 realized natural gas price for Trinidad includes a one-time pricing adjustment of \$0.76/Mcf for prior-period production following a contract amendment with the National Gas Company of Trinidad and Tobago Limited.
- 9) The forecast includes expenditures for Exploration and Development Drilling, Facilities, Leasehold Acquisitions, Capitalized Interest, Dry Hole Costs and Other Property, Plant and Equipment. The forecast also includes Property Acquisitions, Asset Retirement Costs, Non-Cash Exchanges and Transactions and exploration costs incurred as operating expenses.

This press release and any accompanying disclosures may include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical facts, including, among others, statements and projections regarding EOG's future financial position, operations, performance, business strategy, goals, returns and rates of return, budgets, reserves, levels of production, capital expenditures, operating costs and asset sales, statements regarding future commodity prices and

statements regarding the plans and objectives of EOG's management for future operations, are forward-looking statements. EOG typically uses words such as "expect," "anticipate," "estimate," "project," "strategy," "intend," "plan," "target," "aims," "ambition," "initiative," "goal," "may," "will," "focused on," "should" and "believe" or the negative of those terms or other variations or comparable terminology to identify its forward-looking statements. In particular, statements, express or implied, concerning EOG's future financial or operating results and returns or EOG's ability to replace or increase reserves, increase production, generate returns and rates of return, replace or increase drilling locations, reduce or otherwise control drilling, completion and operating costs and capital expenditures, generate cash flows, pay down or refinance indebtedness, achieve, reach or otherwise meet initiatives, plans, goals, ambitions or targets with respect to emissions, other environmental matters or safety matters, pay and/or increase regular and/or special dividends or repurchase shares are forward-looking statements. Forward-looking statements are not guarantees of performance. Although EOG believes the expectations reflected in its forward-looking statements are reasonable and are based on reasonable assumptions, no assurance can be given that such assumptions are accurate or will prove to have been correct or that any of such expectations will be achieved (in full or at all) or will be achieved on the expected or anticipated timelines. Moreover, EOG's forward-looking statements may be affected by known, unknown or currently unforeseen risks, events or circumstances that may be outside EOG's control. Important factors that could cause EOG's actual results to differ materially from the expectations reflected in EOG's forward-looking statements include, among others:

- the timing, magnitude and duration of changes in prices for, supplies of, and demand for, crude oil and condensate liquids (NGLs), natural gas and related commodities;
- the extent to which EOG is successful in its efforts to acquire or discover additional reserves;
- the extent to which EOG is successful in its efforts to (i) economically develop its acreage in, (ii) produce reserves, anticipated production levels and rates of return from, (iii) decrease or otherwise control its drilling, completion and capital expenditures related to, and (iv) maximize reserve recoveries from, its existing and future crude oil and natural gas exploration and development projects and associated potential and existing drilling locations;
- the success of EOG's cost-mitigation initiatives and actions in offsetting the impact of any inflationary or other price increases on operating costs and capital expenditures;
- the extent to which EOG is successful in its efforts to market its production of crude oil and condensate, NGLs and natural gas;
- security threats, including cybersecurity threats and disruptions to our business and operations from breaches of our technology systems, physical breaches of our facilities and other infrastructure or breaches of the information technology facilities and infrastructure of third parties with which we transact business, and enhanced regulatory focus on the security and disclosure requirements relating to, cyber incidents;
- the availability, proximity and capacity of, and costs associated with, appropriate gathering, processing, compression, transportation, refining, liquefaction and export facilities and equipment;
- the availability, cost, terms and timing of issuance or execution of mineral licenses, concessions and leases and other permits and rights-of-way, and EOG's ability to retain mineral licenses, concessions and leases;
- the impact of, and changes in, government policies, laws and regulations, including climate change-related regulations and initiatives (for example, with respect to air emissions); tax laws and regulations (including, but not limited to, carbon and other emissions-related legislation); environmental, health and safety laws and regulations relating to disposal of drilling fluids and other wastes, hydraulic fracturing and access to and use of water; laws and regulations affecting acreage and permitting for oil and gas drilling and the calculation of royalty payments in respect of oil and gas production and regulations imposing additional permitting and disclosure requirements, additional operating restrictions and other restrictions on drilling and completion operations and on the transportation of crude oil, NGLs and natural gas; laws and regulations with respect to financial and other derivatives and hedging activities; and laws and regulations with respect to import and export of crude oil, natural gas and related commodities;
- the impact of climate change-related legislation, policies and initiatives; climate change-related political, social and environmental activism; and physical, transition and reputational risks and other potential developments related to climate change;
- the extent to which EOG is able to successfully and economically develop, implement and carry out its emissions reduction, environmental or safety-related initiatives and achieve its related targets, goals, ambitions and initiatives;
- EOG's ability to effectively integrate acquired crude oil and natural gas properties into its operations, identify and address and potential issues with respect to such properties and accurately estimate reserves, production, drilling, completion and operating costs and capital expenditures with respect to such properties;
- the extent to which EOG's third-party-operated crude oil and natural gas properties are operated successfully, economically and in compliance with applicable laws and regulations;
- competition in the oil and gas exploration and production industry for the acquisition of licenses, concessions, leases and other properties;
- the availability and cost of, and competition in the oil and gas exploration and production industry for, employees, personnel, facilities, equipment, materials (such as water, sand, fuel and tubulars) and services;
- the accuracy of reserve estimates, which by their nature involve the exercise of professional judgment and may therefore be imprecise;
- weather and natural disasters, including its impact on crude oil and natural gas demand, and related delays in drilling, installation and operation (by EOG or third parties) of production, gathering, processing, refining, liquefaction, completion, storage, transportation, and export facilities;
- the ability of EOG's customers and other contractual counterparties to satisfy their obligations to EOG and, related to that, access the credit and capital markets to obtain financing needed to satisfy their obligations to EOG;

- EOG's ability to access the commercial paper market and other credit and capital markets to obtain financing on terms acceptable, if at all, and to otherwise satisfy its capital expenditure requirements;
- the extent to which EOG is successful in its completion of planned asset dispositions;
- the extent and effect of any hedging activities engaged in by EOG;
- the timing and extent of changes in foreign currency exchange rates, interest rates, inflation rates, global and domestic market conditions and global and domestic general economic conditions;
- the economic and financial impact of epidemics, pandemics or other public health issues;
- geopolitical factors and political conditions and developments around the world (such as the imposition of tariffs or economic sanctions, political instability and armed conflicts), including in the areas in which EOG operates;
- the extent to which EOG incurs uninsured losses and liabilities or losses and liabilities in excess of its insurance coverage;
- the other factors described under ITEM 1A, Risk Factors of EOG's Annual Report on Form 10-K for the fiscal year ended December 31, 2024 and any updates to those factors set forth in EOG's subsequent Quarterly Reports on Form 10-Q or Reports on Form 8-K.

In light of these risks, uncertainties and assumptions, the events anticipated by EOG's forward-looking statements may not occur, and, if any of such events do, we may not have anticipated the timing of their occurrence or the duration or extent of their impact on our actual results. Accordingly, you should not place any undue reliance on any of EOG's forward-looking statements. EOG's forward-looking statements speak only as of the date made, and EOG undertakes no obligation, other than as required by applicable law, to update or revise its forward-looking statements, whether as a result of new information, subsequent events, anticipated or unanticipated circumstances or otherwise.

#### Historical Non-GAAP Financial Measures:

Reconciliation schedules and definitions for the historical non-GAAP financial measures included or referenced herein as well as related discussion can be found on the EOG website at [www.eogresources.com](http://www.eogresources.com).

#### Cautionary Notice Regarding Forward-Looking Non-GAAP Financial Measures:

In addition, this press release and any accompanying disclosures may include or reference certain forward-looking, non-GAAP financial measures, such as free cash flow, cash flow provided by operating activities before changes in working capital and return on capital employed, and certain related estimates regarding future performance, commodity prices and operating and financial results. Because we provide these measures on a forward-looking basis, we cannot reliably or reasonably predict certain of the necessary components of the most directly comparable forward-looking GAAP measures, such as future changes in working capital and future impairments. Accordingly, we are unable to present a quantitative reconciliation of such forward-looking, non-GAAP financial measures to the respective most directly comparable forward-looking GAAP financial measures without unreasonable efforts. The unavailable information could have a significant impact on our ultimate results. However, management believes these forward-looking, non-GAAP measures may be a useful tool for the investment community in comparing EOG's forecasted financial performance to the forecasted financial performance of other companies in the industry. Any such forward-looking measures and estimates are intended to be illustrative only and are not intended to reflect the results that EOG will necessarily achieve for the period(s) presented; EOG's actual results may differ materially from such measures and estimates.

#### Oil and Gas Reserves:

The United States Securities and Exchange Commission (SEC) permits oil and gas companies, in their filings with the SEC, to disclose not only "proved" reserves (i.e., quantities of oil and gas that are estimated to be recoverable with a high degree of confidence), but also "probable" reserves (i.e., quantities of oil and gas that are as likely as not to be recovered) as well as "possible" reserves (i.e., additional quantities of oil and gas that might be recovered, but with a lower probability than probable reserves). Statements of reserves are only estimates and may not correspond to the ultimate quantities of oil and gas recovered. Any reserve or resource estimates provided in this press release or any accompanying disclosures that are not specifically designated as being estimates of proved reserves may include "potential" reserves, "resource potential" and/or other estimated reserves or estimated resources not necessarily calculated in accordance with, or contemplated by, the SEC's latest reserve reporting guidelines. Investors are urged to consider closely the disclosure in EOG's Annual Report on Form 10-K for the fiscal year ended December 31, 2024 (and any updates to such disclosure set forth in EOG's subsequent Quarterly Reports on Form 10-Q or Current Reports on Form 8-K), available from EOG at P.O. Box 4362, Houston, Texas 77210-4362 (Attn: Investor Relations). You can also obtain this report from the SEC by calling 1-800-SEC-0330 or from the SEC's website at [www.sec.gov](http://www.sec.gov).

## Non-GAAP Financial Measures

To supplement the presentation of its financial results prepared in accordance with generally accepted accounting principles in the United States of America (GAAP), EOG's quarterly earnings releases and related conference calls, accompanying investor presentation slides and presentation slides for investor conferences contain certain financial measures that are not prepared or presented in accordance with GAAP. These non-GAAP financial measures may include, but are not limited to, Adjusted Net Income (Loss), Cash Flow from Operations Before Changes in Working Capital, Free Cash Flow, Net Debt and related statistics.

A reconciliation of each of these measures to their most directly comparable GAAP financial measure and related discussion is included in the tables on the following pages and can also be found in the "Reconciliations & Guidance" section of the "Investors" page of the EOG website at [www.eogresources.com](http://www.eogresources.com).

As further discussed in the tables on the following pages, EOG believes these measures may be useful to investors who follow the practice of some industry analysts who make certain adjustments to GAAP measures (for example, to exclude non-recurring items) to facilitate comparisons to others in EOG's industry, and who utilize non-GAAP measures in their calculations of certain statistics (for example, return on capital employed and return on equity) used to evaluate EOG's performance.

EOG believes that the non-GAAP measures presented, when viewed in combination with its financial results prepared in accordance with GAAP, provide a more complete understanding of the factors and trends affecting the company's performance. As is discussed in the tables on the following pages, EOG uses these non-GAAP measures for purposes of (i) comparing EOG's financial performance with the financial performance of other companies in the industry and (ii) analyzing EOG's financial performance across periods.

The non-GAAP measures presented should not be considered in isolation, and should not be considered as a substitute for, or as an alternative to, EOG's reported Net Income (Loss), Long-Term Debt (including Current Portion of Long-Term Debt), Net Cash Provided by Operating Activities and other financial results calculated in accordance with GAAP. The non-GAAP measures presented should be read in conjunction with EOG's consolidated financial statements prepared in accordance with GAAP.

In addition, because not all companies use identical calculations, EOG's presentation of non-GAAP measures may not be comparable to, and may be calculated differently from, similarly titled measures disclosed by other companies, including its peer companies. EOG may also change the calculation of one or more of its non-GAAP measures from time to time - for example, to account for changes in its business and operations or to more closely conform to peer company or industry analysts' practices.

## Direct ATROR

The calculation of EOG's direct after-tax rate of return (ATROR) is based on EOG's net estimated recoverable reserves for a particular well(s) or play, the estimated net present value of the future net cash flows from such reserves (for which EOG utilizes certain assumptions regarding future commodity prices and operating costs) and EOG's direct net costs incurred in drilling or acquiring such well(s). As such, EOG's direct ATROR for a particular well(s) or play cannot be calculated from EOG's consolidated financial statements.

## Adjusted Net Income

In millions of USD, except share data (in millions) and per share data (Unaudited)

The following tables adjust reported Net Income (Loss) (GAAP) to reflect actual net cash received from (payments for) settlements of financial commodity derivative contracts by eliminating the net unrealized mark-to-market (gains) losses from these and other derivative transactions, to eliminate the net (gains) losses on asset dispositions, to add back impairment charges related to certain of EOG's assets (which are generally (i) attributable to declines in commodity prices, (ii) related to sales of certain oil and gas properties or (iii) the result of certain other events or decisions (e.g., a periodic review of EOG's oil and gas properties or other assets)), and to make certain other adjustments to exclude non-recurring and certain other items as further described below. EOG believes this presentation may be useful to investors who follow the practice of some industry analysts who adjust reported company earnings to match hedge realizations to production settlement months and make certain other adjustments to exclude non-recurring and certain other items. EOG management uses this information for purposes of comparing its financial performance with the financial performance of other companies in the industry.

In millions of USD (Unaudited)

The following tables reconcile Net Cash Provided by Operating Activities (GAAP) to Cash Flow from Operations Before Changes in Working Capital (Non-GAAP). EOG believes this presentation may be useful to investors who follow the practice of some industry analysts who adjust Net Cash Provided by Operating Activities for Changes in Components of Working Capital and Other Assets and Liabilities, Changes in Components of Working Capital Associated with Investing Activities and certain other adjustments to exclude non-recurring and certain other items as described below. EOG defines Free Cash Flow (Non-GAAP) for a given period as Cash Flow from Operations Before Changes in Working Capital (Non-GAAP) (see below reconciliation) for such period less the Total Capital Expenditures (Non-GAAP) during such period, as is illustrated below. EOG management uses this information for comparative purposes within the industry.

- (1) Effective January 1, 2024, EOG combined Transportation Costs and Gathering and Processing Costs into one line item titled Gathering, Processing and Transportation Costs. This presentation has been conformed for all periods presented and had no impact on previously reported Net Income.
- (2) In general, EOG excludes impairments which are (i) attributable to declines in commodity prices, (ii) related to sales of certain oil and gas properties or (iii) the result of certain other events or decisions (e.g., a periodic review of EOG's oil and gas properties or other assets). EOG believes excluding these impairments from total exploration costs is appropriate and provides useful information to investors, as such impairments were caused by factors outside of EOG's control (versus, for example, impairments that are due to EOG's proved oil and gas properties not being as productive as it originally estimated).
- (3) EOG believes excluding the above-referenced items from General and Administrative Costs is appropriate and provides useful information to investors, as EOG views such items as non-recurring.
- (4) EOG believes excluding the above-referenced items from Taxes Other Than Income is appropriate and provides useful information to investors, as EOG views such items as non-recurring.
