And NexTier Energy Launch Strategic Collaboration to Advance Heavy Oil Recovery from Carbonate Reservoirs in the Middle East

[Sonoro Energy Ltd.](#) ("Sonoro" or the "Company" (TSX Venture: SNV) is pleased to announce that Sonoro, Advanced BioCatalytics Corporation, and NexTier Energy LLC have developed a strategic collaboration focused on enhancing heavy oil production from carbonate reservoirs in the Middle East through the application of cutting-edge enhanced oil recovery (EOR) technologies. The partnership leverages the complementary strengths of each company-biotechnology innovation, reservoir engineering expertise, and regional energy leadership-to address one of the more technically challenging resource opportunities in the global energy sector

This collaboration represents a step toward redefining what's possible in carbonate heavy oil recovery-blending science, strategy, and regional expertise to deliver impactful results.

The initiative is centered on the deployment of advanced specialty chemical formulations developed by Irvine, California based Advanced BioCatalytics. These environmentally responsible chemical solutions, derived from next-generation biotechnology, have demonstrated an ability to improve heavy oil mobility, reduce interfacial tension, and increase recovery efficiency in carbonate reservoirs.

Dallas, Texas based, NexTier Energy will lead the technical evaluation, modeling, and field design of the EOR programs, applying its expertise in subsurface analysis, reservoir simulation, and operational implementation.

Sonoro Energy will oversee regional engagement and stakeholder alignment. Ms. Sara Akbar, Chairperson of Sonoro Energy, and one of the most respected leaders in the Middle East oil and gas industry, will facilitate introductions to national oil companies, energy ministries, and key stakeholders across the region to gain access to the data needed to perform reservoir studies and high-grade investment opportunities. With a distinguished track record that includes leadership roles at Kuwait Energy and Kuwait Foreign Petroleum Exploration Company, Ms. Akbar brings unparalleled insight and opportunity access to the initiative.

Initial trial results by Advanced BioCatalytics in select Middle Eastern fields have already produced promising outcomes, validating the effectiveness of these chemical technologies and application.

The combination of innovative technology, engineering excellence, and strategic partnerships aims to unlock significant incremental production in a cost-effective and environmentally conscious manner.

"Our collaboration is rooted in a field-specific approach," said Greg Renwick of Sonoro. "Rather than applying a one-size-fits-all solution, we focus on designing custom chemical formulations and delivery strategies for each reservoir, based on its geologic conditions, oil chemistry, and production history. The early results are encouraging and point to substantial upside in fields that have not yet achieved their recovery potential."

Forward-looking Statements

Certain information in this news release constitutes forward-looking statements under applicable securities laws. Any statements that are contained in this news release that are not statements of historical fact may be deemed to be forward-looking statements. Forward-looking statements are often identified by terms such as "may," "should," "anticipate," "expects," "estimates," "seeks" and similar expressions. In particular, without limiting the generality of the foregoing, this news release contains forward-looking information regarding: the ability of the parties to negotiate satisfactory terms for, and to execute, the Definitive Agreement; the

satisfaction of all conditions precedent to the completion of the Proposed Transaction, including receipt of TSX Venture Exchange, regulatory and shareholder approvals; the Company's ability to continue as a going concern, general business, economic, competitive, political, and social uncertainties; delay or failure to receive applicable approvals; and the results of operations.

Forward-looking statements necessarily involve known and unknown risks, including, without limitation, risks associated with oil and gas exploration, development, exploitation, production, marketing and transportation, loss of markets, volatility of commodity prices, currency fluctuations, imprecision of resource and reserve estimates, environmental risks, competition from other producers, inability to retain drilling rigs and other services, delays resulting from or inability to obtain required regulatory approvals, changes in legislation including but not limited to income tax, environmental laws and regulatory matters, the effectiveness of the technology to be employed by the Company, the Company's ability to access sufficient capital from internal and external sources. Readers are cautioned that the foregoing list of factors is not exhaustive.

Readers are cautioned not to place undue reliance on forward-looking statements as there can be no assurance that the plans, intentions or expectations upon which they are placed will occur. Such information, although considered reasonable by management at the time of preparation, may prove to be incorrect and actual results may differ materially from those anticipated. Forward-looking statements contained in this news release are expressly qualified by this cautionary statement.

Additional information on these and other factors that could affect Sonoro's operations or financial results are included in Sonoro's reports on file with Canadian securities regulatory authorities and may be accessed through the SEDAR+ website (www.sedarplus.ca) or by contacting Sonoro. The forward-looking statements contained in this news release are made as of the date of this news release and Sonoro does not undertake any obligation to update publicly or to revise any of the included forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by securities law.

Neither the TSX Venture Exchange nor its Regulation Service Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
