

Green Battery Minerals Inc. Stallion Claims Partial Lapse

13.05.2025 | [The Newswire](#)

[Green Battery Minerals Inc.](#) (TSXV: GEM, FSE: BK2P,) announces that several of the Companies Stallion Claims have lapsed. The Stallion Project is comprised of several Claims that are located in Northern B.C. and is situated 930 km north of Vancouver, BC, and 460 km northwest of Prince George, BC. The initial Stallion Projects claims were acquired in August 2021 and over the past several years more claims were added. As the several claim blocks have different renewal dates not all of the claims have lapsed, and some are still in good standing.

The Company had retained a consulting company to manage and maintain all of its claims who failed to file the necessary assessment reports to renew the claims in a timely manner resulting in the lapse of several Stallion claims. The Company is seeking legal opinion in order to determine a potential insurance claim or legal action. The Company will update shareholders as events arise.

About the Company:

Green Battery Minerals is managed by a team with over 150 years collectively with a proven track record of not just finding numerous mines but building and operating them too. The Green Battery Mineral management team's most recent success is discovering the Berkwood graphite resource in Northern Quebec. Green Battery Mineral owns this asset 100 percent, and the Company's shareholders will benefit from this asset as the demand for Graphite for electric vehicles increases significantly.

On Behalf of the Board of Directors, Green Battery Minerals Inc.

'Thomas Yingling'
President, CEO & Director

Disclaimer for Forward-Looking Information: Certain statements in this document which are not purely historical are forward-looking statements, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Forward looking statements in this news release include that the Company will carry out the drill program described in this news release, conduct the Offering and expend funds on Berkwood Graphite Project exploration. It is important to note that the Company's actual business outcomes and exploration results could differ materially from those in such forward-looking statements. Risks and uncertainties include that further permits may not be granted timely or at all; the mineral claims may prove to be unworthy of further expenditure; there may not be an economic mineral resource; methods we thought would be effective may not prove to be in practice or on our claims; economic, competitive, governmental, environmental and technological factors may affect the Company's operations, markets, products and prices; our specific plans and timing drilling, field work and other plans may change; we may not have access to or be able to develop any minerals because of cost factors, type of terrain, or availability of equipment and

technology; and we may also not raise sufficient funds to carry out our plans. Additional risk factors are discussed in the section entitled "Risk Factors" in the Company's Management Discussion and Analysis for its recently completed fiscal period, which is available under Company's SEDAR profile at www.sedar.com. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits the Company will obtain from them. These forward-looking statements reflect management's current views and are based on certain expectations, estimates and assumptions, which may prove to be incorrect. Except as required by law, we will not update these forward-looking statement risk factors. Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this News Release.
