

Stellar AfricaGold Inc. Board Endorses Tichka Est Geological Model And Drill Plans

16.05.2025 | [The Newswire](#)

[Stellar AfricaGold Inc.](#) (TSX-V: SPX, FRA: 6YP1) ("Stellar" or the "Company") is pleased to report that following a comprehensive technical review and strategic site visit by Dr. David Selley and Dr. Paul Kitto to the Tichka Est Gold Project in Morocco, the Company's Board of Directors has unanimously endorsed the path forward outlined by the technical team.

The Board's endorsement is based upon the conclusions reached by Dr. Selley and Dr. Kitto of a geological model that Tichka Est Zone B hosts a structurally controlled gold system within stacked diorite sills. Their conclusions are supported by robust assay results from prior trenching programs including a 155.7 metres trench averaging 3.5 g/t Au. (see News Release dated October 4, 2022.) The Company believes the current understanding of mineralisation controls, particularly the role of rheological contrasts and subvertical fault systems, provides a credible foundation for prioritised drill testing.

Key Highlights of the Strategic Plan:

- Confirmation of a stepwise drill strategy to test multiple mineralised horizons.

- Alignment on the immediate construction of new drill access infrastructure.

- Emphasis on logistical planning tailored to accommodate steep terrain and identified mineralised envelopes.

"The Tichka Est gold project is now ready for an ambitious 2025 exploration season," said François Lalonde, President and CEO. "The Board has expressed its confidence in this geological model and in management's technical and operational roadmap for the future. This clarity and confidence will allow Stellar to move forward decisively with its 2025 drill program and to actively pursue its ongoing exploration to identify additional drill targets within the overall permit area."

The Company remains on track to advance the Tichka Est project through its next major technical milestones during the 2025 field season.

About Stellar Africagold Inc.

Stellar AfricaGold Inc. is a Canadian precious metal exploration company listed on the TSX Venture Exchange symbol TSX.V: SPX, the Tradegate Exchange TGAT: 6YP and the Frankfurt Stock Exchange FSX: 6YP.

The Company maintains its head office in Vancouver, BC and has a representative office in Casablanca, Morocco.

Stellar's principal exploration projects are its advancing gold discovery at the Tichka Est Gold Project in Morocco, and its early-stage exploration Zuénoula Gold Project in Côte d'Ivoire.

The technical content of this press release has been reviewed and approved by M. Yassine Belkabar, MScDIC, CEng, MIMMM, a Stellar director and a Qualified Person as defined in NI 43-101.
