# Vizsla Copper Commences Aggressive Discovery-focused Exploration Season Across Its British Columbia Project Portfolio

28.05.2025 | CNW

VANCOUVER, May 28, 2025 - <u>Vizsla Copper Corp.</u> (TSXV: VCU) (OTCQB: VCUFF) (FRANKFURT: 97E0) ("Vizsla Co "Company") is pleased to report that it has commenced its multi-disciplinary, discovery-focused 2025 field season acros BC-based project portfolio. Exploration programs consisting of geological, geochemical, geophysical surveys and drillin planned at the Copperview, Poplar and Woodjam projects. Work has now begun at the Copperview Project.

# **HIGHLIGHTS**

- Exploration has commenced at Copperview: Geological and geophysical crews have been mobilised to the Copp
  project to further investigate the M5 target area. The highest-priority targets may be drill tested later this year.
- Drilling set to commence at Poplar: Drill crews are expected to mobilize to the Poplar Project in June. Over 2,000 drilling are planned to systematically test the highly prospective Thira porphyry-related copper target.
- Drilling planned at Woodjam: Drilling at the Woodjam project will be focused on new discoveries at various porphy
  that may include the Megaton area and the untested Great Plains target. Approximately 2,000 meters of drilling, s
  late-summer, is planned.

"The successful closing of our recent \$5.5 million financing has set the foundation for an aggressive field program acrost target areas in the project portfolio" commented Steve Blower, Vice President of Exploration. "Drilling will concentrate of discoveries at multiple projects, rather than extensions of known mineralization."

2025 Multi-project Exploration Program

The focus of the 2025 exploration program across the Company's three main projects is the discovery of a new porphy copper-gold±molybdenum system. High-priority targets at the Copperview, Poplar and Woodjam projects will be advan include:

Copperview Project: The recently defined M5 target (see February 19<sup>th</sup>, 2025 News Release) is the focus of ongoing go mapping, geochemical surveys and expanded IP geophysics. The IP survey will comprise over 20 line kilometers across east-west oriented survey lines (Figure 2). The lines are planned north and south of the two 2024 reconnaissance style successfully identified the open-ended M5 target (see February 19<sup>th</sup>, 2025 News Release). The M5 high-chargeability a spatially coincident with magnetic-low and conductivity-high anomalies and is considered highly prospective for concease porphyry-related mineralization in the dominantly till-covered area. The M5 target area is along trend, 6.5 kilometers no Copper's Gate discovery<sup>2</sup> (Figure 1). Contingent on geochemical and geophysical results, the M5 target may be drill test

Poplar Project: Over 2,000 meters of diamond drilling is planned at the Thira (formerly known as Poplar South) porphyr copper-molybdenum target (see January 15<sup>th</sup>, 2024 News Release). The Thira target consists of a broad ~8 by 2 kilom porphyry-related alteration (phyllic and propylitic) exposed along road-cuts and sparse outcrop. The centre of the altera covered by till where coincident high-chargeability, magnetic, EM, and multi-element soil anomalies define a highly prosporphyry-related copper target (see October 8<sup>th</sup>, 2024 News Release). Further details of the drill program at Thira will be prior to the start of drilling in the coming weeks.

Woodjam Project: Approximately 2,000 meters of diamond drilling is planned at various targets, including the Megaton Plains porphyry-related copper-gold-molybdenum targets. The Megaton and Great Plains targets are interpreted to be similar geology as the Southeast deposit, located approximately 2 kilometers to the southwest and 4 kilometers to the respectively. Drilling at Megaton will target the northern extent of porphyry-related copper and gold mineralization discoprevious drill programs (see December 5<sup>th</sup>, 2023 News Release) and associated with a recently defined high-chargeab

10.11.2025 Seite 1/4

anomaly. Drilling at Great Plains will target a broad high-chargeability anomaly largely concealed beneath a thin venee (see October 30<sup>th</sup>, 2024 News Release). Further details of the drill program at Woodjam will be released in the coming

Figure 1. Map of the Copperview Project showing the location of the M5 target in relation to a regional magnetic-high lin Kodiak Copper's Gate discovery.<sup>2</sup>

Figure 2. Project scale high-resolution magnetic data<sup>1</sup> showing the location of the 2024 IP survey and the strong charge anomaly across the M5 target (300m depth slice). See February 19<sup>th</sup>, 2025 News Release for details. The recently comsurvey is focussed north and south of the 2024 reconnaissance lines.

# **Digital Marketing Services Agreement**

The Company further reports that it has entered into an agreement with Machai Capital Inc. ("Machai") dated May 22, 2 "Machai Agreement"), pursuant to which Machai will provide a digital marketing campaign. The term of the Machai agree-6-month for a total retainer of C\$303,000 (plus GST), to be paid up front.

Under the Machai agreement, Machai will execute a comprehensive digital media marketing campaign for the Compan commencing in May, 2025, including branding and content creation, data optimization services, including search engine optimization, search engine marketing, lead generation, digital marketing, social media marketing, e-mail marketing and marketing.

Machai is a marketing, advertising and public awareness firm based out of Vancouver, B.C., specializing in advertising awareness in the metals and mining, technology, and special situation sectors.

The payment described herein will come from the Company's general working capital account. Other than as discussed Machai does not have any interest, directly or indirectly, in the company or any right or intent to acquire such an interest arm's length to the company, and the Machai agreement remains subject to the approval of the TSX Venture Exchange

#### Stock Option Grant

The Company has granted a total of 18,500,000 stock options (the "Options") to directors, officers, employees and contribute Company. The Options will have an exercise price of \$0.06, expire five years from the date of grant and shall vest of years. The Options were granted pursuant to the Plan and are subject to regulatory approval.

# About Vizsla Copper

Vizsla Copper is a Cu-Au-Mo focused mineral exploration and development company headquartered in Vancouver, Ca Company is primarily focused on its flagship Woodjam project, located within the prolific Quesnel Terrane, 55 kilometer community of Williams Lake, British Columbia. It has three additional copper properties: Poplar, Copperview, and Redgistuated amongst significant infrastructure in British Columbia. The Company's growth strategy is focused on the exploit development of its copper properties within its portfolio in addition to value accretive acquisitions. Vizsla Copper's vision responsible copper explorer and developer in the stable mining jurisdiction of British Columbia, Canada and it is comm socially responsible exploration and development, working safely, ethically and with integrity.

Vizsla Copper is a spin-out of Vizsla Silver and is backed by Inventa Capital Corp., a premier investment group founded with the goal of discovering and funding opportunities in the resource sector. Additional information about the Company on SEDAR+ (www.sedarplus.ca) and the Company's website (www.vizslacopper.com).

# **Qualified Person**

The Company's disclosure of technical or scientific information in this press release has been reviewed and approved to Christopher Leslie, Ph.D., P.Geo., Technical Advisor for Vizsla Copper. Dr. Leslie is a Qualified Person as defined under of National Instrument 43-101. Some technical information contained in this release is historical in nature and has been from public sources believed to be accurate. The technical information has not been verified by Vizsla Copper and may

#### FORWARD LOOKING STATEMENTS

The information contained herein contains "forward-looking statements" within the meaning of the United States Private Litigation Reform Act of 1995 and "forward-looking information" within the meaning of applicable Canadian securities le "Forward-looking information" includes, but is not limited to, statements with respect to the activities, events or develop the Company expects or anticipates will or may occur in the future, including, without limitation, planned exploration act Generally, but not always, forward-looking information and statements can be identified by the use of words such as "p "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "believes" or the ne connotation thereof or variations of such words and phrases or state that certain actions, events or results "may", "coul "might" or "will be taken", "occur" or "be achieved" or the negative connotation thereof. Forward-looking statements in t release include, among others, statements relating to: obtaining required regulator approvals for the Copperview Acqui the RG Copper Acquisition; satisfying the requirements of the Underlying Option Agreement; the exploration and devel the Poplar Project, Woodjam Project, Redgold Project and Copperview Project; and the Company's growth and business strategies.

Such forward-looking information and statements are based on numerous assumptions, including among others, that the planned exploration activities are as anticipated, the anticipated cost of planned exploration activities, that general busine economic conditions will not change in a material adverse manner, that financing will be available if and when needed reasonable terms, that third party contractors, equipment and supplies and governmental and other approvals required the Company's planned exploration activities will be available on reasonable terms and in a timely manner. Although the assumptions made by the Company in providing forward-looking information or making forward-looking statements are reasonable by management at the time, there can be no assurance that such assumptions will prove to be accurate.

Forward-looking information and statements also involve known and unknown risks and uncertainties and other factors cause actual events or results in future periods to differ materially from any projections of future events or results expre implied by such forward-looking information or statements, including, among others: negative operating cash flow and conthird party financing, uncertainty of additional financing, no known mineral reserves or resources, the limited operating the Company, the influence of a large shareholder, aboriginal title and consultation issues, reliance on key management personnel, actual results of exploration activities being different than anticipated, changes in exploration programs base results, availability of third party contractors, availability of equipment and supplies, failure of equipment to operate as a accidents, effects of weather and other natural phenomena and other risks associated with the mineral exploration inducenvironmental risks, changes in laws and regulations, community relations and delays in obtaining governmental or oth approvals.

Although the Company has attempted to identify important factors that could cause actual results to differ materially fro contained in the forward-looking information or implied by forward-looking information, there may be other factors that continuous to be as anticipated, estimated or intended. There can be no assurance that forward-looking information and statem prove to be accurate, as actual results and future events could differ materially from those anticipated, estimated or intended. Accordingly, readers should not place undue reliance on forward-looking statements or information. The Company unduples of the company information of events except as required to securities laws.
