

Auric Minerals Announces Completion of Phase 1 Exploration on the Bub Property in Central Mineral Belt, Labrador

30.05.2025 | [Newsfile](#)

Vancouver, May 30, 2025 - [Auric Minerals Corp.](#) (CSE: AUMC) ("Auric" or the "Company") is pleased to report the successful completion of Phase 1 fieldwork at its Bub Uranium Property ("Bub" or the "Property") in Labrador's Central Mineral Belt ("CMB"). In spring 2025, a four-person geological team collected 60 lake-bottom sediment samples and 9 rock samples over four field days operating out of Goose Bay, Labrador.

Chris Huggins, CEO, commented: "Completing this first-pass geochemical program so early in the field season gives us a robust foundation for the year ahead. Analytical results expected in the coming weeks will guide tighter follow-up work and help vector us toward high-priority drill targets. We are excited to share the analytical results with shareholders and to keep building momentum at Bub."

Phase 1 Sampling Highlights

- 60 lake bottom sediment samples systematically collected across high-priority radiometric anomalies and structural trends.
- 9 rock samples taken from exposed outcrop coincident with geophysical and geochemical targets.
- Program executed safely and on schedule by a crew of four using a chartered helicopter based in Happy Valley-Goose Bay, Labrador.
- Analytical results are expected in the coming weeks; the Company will report findings once received and interpreted.
- The Phase 1 sampling described above directly tests these radiometric and structural targets and will refine Auric's understanding of uranium dispersion across the Property.

About the Bub Property

- Location: 55 km southwest of Postville, NL and 200 km northeast of Auric's Route 500 Project.
- Geology: Situated in the southern CMB along regional structures hosting deposits such as Michelin, Mustang and Jacques Lake.
- Targeting Rationale: Radiometric anomalies correlate with anomalous uranium in historical lake-sediment data within a northeast-trending, structurally controlled corridor.

Next Steps

Upon receipt of assay results, Auric plans to:

1. Integrate new geochemical data with existing geophysical models.
2. Define follow-up ground mapping, prospecting and detailed sampling grids for summer 2025.
3. Finalize drill target selection for a planned inaugural drill campaign at Bub.

Qualified Person Statement

The technical information in this news release has been reviewed and approved by Jeremy Hanson, P.Geo., a Qualified Person as defined by National Instrument 43-101.

About the Company

Auric is a mineral exploration company based in Oakville, Ontario and holds options over the Route 500, Bub and Portage Uranium properties in Labrador, Manic, Kawip and Kaboose properties in Quebec, and the Goodeye property in British Columbia, Canada.

Note: Readers are cautioned that the geology of nearby properties is not necessarily indicative of the geology of the Company's properties.
