27,532,079*	99.91	24,850	0.09

\* Excluding 53,369,901 shares held by Insiders

About Bravo Mining Corp.

Bravo is a Canadian and Brazil-based mineral exploration and development company focused on advancing its PGM+Au+Ni Luanga Project, as well as our Cu-Au +/- Ni exploration opportunities in the world-class Carajás Mineral Province, Para State, Brazil.

Bravo is one of the most experienced explorers in Carajás. The team, comprising of local and international geologists, has a proven track record of PGM, nickel, and copper discoveries in the region. They have successfully taken a past IOCG greenfield project from discovery to development and production in the Carajás.

The Luanga Project is situated on mature freehold farming land and benefits from being located close to operating mines and a mining-experienced workforce, with excellent access and proximity to existing infrastructure, including road, rail, ports, and hydroelectric grid power. Bravo's current Environmental, Social and Governance activities includes planting more than 35,000 high-value trees in and around the project area, while hiring and contracting locally.

In 2025, the Luanga Project was granted a preliminary licence (see news release dated March 3, 2025) for the development of the project. Combined with the recently updated Mineral Resource Estimate which increased both tonnes and grade (see news release dated February 18, 2025), this places Luanga at the forefront of potential future PGM+Au+Ni projects globally, while benefitting from extensive infrastructure (including road, rail and low cost, reliable hydro power), an experienced work force, shallow depths amenable to potential open pit extraction, and in a geopolitically favourable location close to end-user markets.
