

Desert Mountain Energy Corp. Signs Agreement To Expand Natural Gas Production, Driving Growth And Job Creation In New Mexico

02.07.2025 | [CNW](#)

[Desert Mountain Energy Corp.](#) (the "Company") (TSX.V: DME) (U.S. OTC: DMEHF) (Frankfurt: QM01) from the President of the Company. DME is pleased to announce the signing of an agreement with Roswell Information Park LLC to purchase all natural gas produced by DME in the West Pecos Field. Additionally, Roswell Information Park LLC will serve as the primary purchaser for all natural gas entering the pipeline into the Information Park, including gas not attributed to DME, for which the Company will receive management fees.

DME is collaborating closely with Sustany LLC, Roswell Information Park LLC, and relevant local, state, and federal authorities to foster job creation, long-term growth, and infrastructure enhancements in the region.

The proposed information center is initially expected to generate between 100 to 200 megawatts (MW) of power and will ramp up to in excess of 500 MW. Discussions are underway to sell excess power back into the New Mexico power grid. DME, Sustany LLC and Roswell Information Park LLC are also exploring applications for multiple state and federal infrastructure grant programs to support these initiatives.

"Currently, the construction of the Roswell Information Park, planned to begin Q1 2026, will generate new revenue streams for DME and create valuable job opportunities in New Mexico - driving long-term growth and infrastructure across the region," said Robert Rohlfing, CEO and Executive Director of DME. "Additionally, our collaboration with Sustany LLC to explore hydrogen assets at the West Pecos Field in New Mexico underscores our commitment to advancing innovative, sustainable energy solutions."

In Arizona, Sustany LLC continues to explore the development of the McCauley Field area and the utilization of properties currently owned by DME for the establishment of smaller data centers. These data centers aim to contribute to Arizona's economic growth and optimize DME's existing land holdings.

ABOUT DESERT MOUNTAIN ENERGY

Desert Mountain Energy Corp. is a publicly traded resource company primarily focused on the exploration, development and production of helium, hydrogen and natural gas. The Company is focused on helium extraction from different raw gas sources in an environmental and economic manner, supplying elements deemed critical to the renewable energy and high technology industries.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release. The statements made in this press release may contain certain forward-looking statements that involve a number of risks and uncertainties. Actual events or results may differ from the Company's expectations.

Cautionary Note Regarding Forward-Looking Statements

This news release contains "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and "forward-looking information" within the meaning of applicable Canadian securities legislation. Such forward looking statements and information herein include but are not limited to statements regarding the Company's anticipated performance in the future the planned exploration activities, receipt of positive results from drilling, the completion of further drilling and exploration work, and the timing and results of various activities.

Forward-looking statements or information involve known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company and its operations to be materially different from those expressed or implied by such statements. Such factors include, among others, changes in national and local governments, legislation, taxation, controls, regulations and political or economic developments in Canada and the United States; financial risks due to helium prices, operating or technical difficulties in exploration and development activities; risks and hazards and the speculative nature of resource exploration and related development; risks in obtaining necessary licenses and permits, and challenges to the Company's title to properties.

Forward-looking statements are based on assumptions management believes to be reasonable, including but not limited to the continued operation of the Company's exploration operations, no material adverse change in the market price of commodities, and such other assumptions and factors as set out herein. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or information, there may be other factors that cause results to be materially different from those anticipated, described, estimated, assessed or intended. There can be no assurance that any forward-looking statements or information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements or information. Accordingly, readers should not place undue reliance on forward-looking statements or information. The Company does not intend to, and nor does not assume any obligation to update such forward-looking statements or information, other than as required by applicable law.
