

# Storm Exploration Inc. Appoints Cameron Dorsey to Its Advisory Board

22.07.2025 | [ACCESS Newswire](#)

[Storm Exploration Inc.](#) (TSXV:STRM) ("Storm" or the "Company") is pleased to announce that it has appointed Mr. Cameron Dorsey, M.Sc. to its Advisory Board. Mr. Dorsey is a qualified and experienced geoscientist with a deep understanding of Banded Iron Formation ("BIF") hosted gold deposits and will assist the Company in executing the exploration plan for its Miminiska property in northwestern Ontario.

"Storm is delighted to welcome Cameron to its Advisory Board," commented Bruce Counts, President & CEO of Storm Exploration Inc. "Cameron brings a wealth of knowledge and experience in exploring BIF hosted gold deposits and I am confident that he will make a significant contribution to advancing the Company's flagship Miminiska Project."

## Cameron Dorsey

Cameron is an accomplished exploration geologist with 14 years of experience in mineral exploration across North America. He has managed and consulted on numerous successful projects in world-class mining districts, including Nunavut, Ontario, Quebec, British Columbia and Yukon.

During his time with [Sabina Gold & Silver Corp.](#), Cameron played a key role in advancing the Back River Gold Project in Nunavut, one of Canada's largest high-grade gold deposits hosted in banded-iron formation (BIF). His work ranged from detailed structural interpretation to leading targeted drilling programs that significantly expanded the project's resource base. As a core member of the exploration team, he contributed to growing the Back River resource to over 5 million ounces of gold.

With experience spanning both junior explorers and major mining companies, Cameron brings a unique blend of technical expertise and strategic insight in developing district-scale projects from grassroots discovery through to resource definition. He holds an MSc focused on the tectonics, structure, and stratigraphy of northwest British Columbia, and currently serves as VP Exploration for Golden Sky Minerals and Technical Advisor for Torr Metals. Both companies are exploring orogenic gold and Cu-Au porphyry assets across North America.

## Miminiska Project

The Miminiska Project is located within the Miminiska-Fort Hope greenstone belt, approximately 350 kilometres north of Thunder Bay, Ontario. Miminiska is the Company's primary focus and hosts drill-confirmed, high-grade gold mineralization at two primary targets: Miminiska and Frond (refer to Figure 1). Historical assays include 5.75g/t Au over 20.84m\* and 13.95g/t Au over 5.32m\* with mineralization hosted in banded iron formation and associated shear zones.
