In mid-August, the Peak Gold JV is expected to start processing Manh Choh project's third campaign of 2025 and are guiding to 15,000 ounces of production to Contango's account for this campaign."

During Q2-2025 and subsequent to the period end, the Company has the following updates:

- Manh Choh Project:

- During Q2-2025 the Peak Gold JV, operated by a subsidiary of Kinross Gold Corporations ("Kinross"), (on a 100% basis) processed 255,000 tons of ore with an average grade of 0.220 ounces ("oz") per ton and containing approximately 56,000 oz of gold. Gold recovery averaged 93%, resulting in approximately 52,000 oz of recovered gold, of which Contango's 30% share amounts to 15,700 oz of gold.
- During Q2-2025 17,764 ounces of gold were delivered to Contango and sold during the period with another 750 ounces of gold remaining in recoverable inventory at the end of the quarter.
- For Q2-2025, cash costs on a by-product basis per ounce were \$1,416, and AISC on a by-product basis, per ounce was \$1,548 per ounce. The increase in AISC from the first quarter of 2025 compared to Q2-2025 is primarily a result of sustaining capital expenditures on the planned tractor (truck) replacements and the exploration drilling program at Manh Choh.

- Johnson Tract Project:

- During Q2-2025, the Company continued with ongoing work to permit the underground exploration drift and baseline environmental and engineering work for the road and barge landing easements. Field crews started at the end of July 2025.

- The Company's unrestricted cash position as of June 30, 2025 was \$36.5 M.
