

Maxus Mining Expands Land Holdings at the Quarry Antimony Project in British Columbia, Canada

30.07.2025 | [GlobeNewswire](#)

VANCOUVER, July 30, 2025 - [Maxus Mining Inc.](#) ("Maxus" or the "Company") (CSE: MAXM | FRA: R7V), is pleased to announce that the Company has expanded its land holdings through strategic staking of an additional 1,803 hectares at the Quarry Antimony Project (the "Project" or the "Property") in British Columbia, Canada. The Company is currently undertaking a compilation of all available historic data on the Project to prepare its Phase 1 Exploration Plan.

Scott Walters, CEO of Maxus, commented, "*We are pleased to announce the acquisition of additional claims through low-cost staking along a silver-lead-zinc-antimony (Ag-Pb-Zn-Sb) mineralized trend at the Project. This expansion increases the Property to over 7 kilometres of favourable stratigraphy. Our team is actively compiling historical data to identify high-quality exploration targets in preparation for our Phase 1 exploration program.*"

Figure 1. Quarry Project Outlining Claim Extension

Quarry Antimony Project

The 2,632-hectare Property is located on the north side of the Osilinka River, between Tenakhi and Wasi creeks, approximately 46 kilometres northwest of Germansen Landing. The historic Quarry showing is exposed in a limestone quarry, where recrystallized and dolomitized limestones of the Neoproterozoic Ingenika Group host mineralized quartz veins. Documented minerals include sphalerite, galena, cerussite, chalcopyrite, boulangerite, malachite, azurite, and possibly stibnite¹.

Historical sampling highlights the property's high-grade potential. In 1991, a sample returned assays of 20% Sb, 0.89 g/t Au, 3.8% Cu, 42.5% Pb, and 0.65 g/t Ag.¹ Earlier grab samples collected in 1954 averaged 83.5% Pb and 1575 g/t Ag.¹

The site offers reliable, year-round access, supporting ongoing exploration initiatives. The region is underlain by the Neoproterozoic Ingenika Group and Paleozoic rocks of the Big Creek, Otter Lakes, Atan, Razorback, and Echo Lake groups.

Qualified Person Statement

The scientific and technical information contained in this news release has been reviewed, verified, and approved by Sean Hillacre, P.Geo., Director of the Company and a "qualified person" as defined in NI 43-101 - *Standards of Disclosure for Mineral Projects*. Mr. Hillacre has examined information regarding the historical exploration at the Project, which includes a review of the historical sampling, analytical, and procedures underlying the information and opinions contained herein.

Management cautions that historical results collected and reported by operators unrelated to Maxus have not been verified nor confirmed by its Qualified Person; however, the historical results create a scientific basis for ongoing work at the Project. Management further cautions that historical results, discoveries and published resource estimates on adjacent or nearby mineral properties, whether in stated current resource estimates or

historical resource estimates, are not necessarily indicative of the results that may be achieved on the Project.

About Maxus Mining Inc.

Maxus Mining Inc. (CSE: MAXM | FRA: R7V) is a mineral exploration company focused on locating, acquiring, and if warranted, developing economic mineral properties in premier jurisdictions. The Company is working towards progressing its diverse portfolio of exploration properties which includes approximately 14,356 hectares of prospective terrane comprising 8,178 hectares amongst three antimony projects, 3,123 hectares encompassing the Penny Copper Project & the remaining 422 hectares comprising the Lotto Tungsten Project.

The Penny Copper Project covers approximately 3,123 hectares and has seen exploration activity throughout the last 100+ years with recent work including rock sampling and minor geological mapping². The Penny Copper Project is located near the major past producing Sullivan Mine at Kimberley, British Columbia, an area that has stimulated both junior and major exploration company activities in the past year. Additionally, the Penny Copper Project saw a 2017 work program return 17 grab samples, which returned copper values up to 1,046 ppm Cu (TK17-149c), 1,808 ppm Cu (TK17-28) and 2,388 ppm Cu (TK17-12)².

At the Quarry Antimony Project, in well-established British Columbia, Canada, one historical sample taken assayed 0.89 g/t Au, 3.8% Cu, 0.34% Zn, 42.5% Pb, and 0.65% g/t Ag and 20% Sb¹. A selected grab sample taken in 1980 at the Lotto Tungsten Project from a quartz vein with scheelite assayed 10.97% WO₃³. Additionally, the Altura and Hurley Antimony projects are strategically positioned; Altura is on strike from Equinox Resources recent antimony discovery which saw high-grade naturally occurring antimony with assays up to 69.98% Sb⁴; Hurley neighbours [Endurance Gold Corp.](#)'s Reliance Gold Project which saw antimony results from 2024 work programs include 19.2% Sb and 2.16 g/t Au over 0.5 m encountered during the 2024 drilling program⁵.

Disclaimer for Forward-Looking Information

This news release includes certain "Forward-Looking Statements" within the meaning of the United States

Private Securities Litigation Reform Act of 1995 and "forward-looking information" under applicable Canadian securities laws. When used in this news release, the words "anticipate", "believe", "estimate", "expect", "target", "plan", "forecast", "may", "would", "could", "schedule" and similar words or expressions, identify forward-looking statements or information.

Forward-looking statements and forward-looking information relating to any future mineral production, liquidity, enhanced value and capital markets profile of Maxus', future growth potential for Maxus and its business, and future exploration plans are based on management's reasonable assumptions, estimates, expectations, analyses and opinions, which are based on management's experience and perception of trends, current conditions and expected developments, and other factors that management believes are relevant and reasonable in the circumstances, but which may prove to be incorrect. Assumptions have been made regarding, among other things, the price of copper, gold, tungsten, antimony and other metals; costs of exploration and development; the estimated costs of development of exploration projects; Maxus' ability to operate in a safe and effective manner and its ability to obtain financing on reasonable terms.

This news release contains "forward-looking information" within the meaning of the Canadian securities laws. Statements, other than statements of historical fact, may constitute forward looking information and include, without limitation, statements with respect to the Project and its mineralization potential; the Company's objectives, goals, or future plans with respect to the Project; further exploration work on the Project in the future. With respect to the forward-looking information contained in this news release, the Company has made numerous assumptions regarding, among other things, the geological, metallurgical, engineering, financial and economic advice that the Company has received is reliable and are based upon practices and methodologies which are consistent with industry standards. While the Company considers these assumptions to be reasonable, these assumptions are inherently subject to significant uncertainties and contingencies. Additionally, there are known and unknown risk factors which could cause the Company's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information contained herein. Known risk factors include, among others: fluctuations in commodity prices and currency exchange rates; uncertainties relating to interpretation of well results and the geology, continuity and grade of copper, gold, tungsten, antimony and other metal deposits; uncertainty of estimates of capital and operating costs, recovery rates, production estimates and estimated economic return; the need for cooperation of government agencies in the exploration and development of properties and the issuance of required permits; the need to obtain additional financing to develop properties and uncertainty as to the availability and terms of future financing; the possibility of delay in exploration or development programs or in construction projects and uncertainty of meeting anticipated program milestones; uncertainty as to timely availability of permits and other governmental approvals; increased costs and restrictions on operations due to compliance with environmental and other requirements; increased costs affecting the metals industry and increased competition in the metals industry for properties, qualified personnel, and management. All forward-looking information herein is qualified in its entirety by this cautionary statement, and the Company disclaims any obligation to revise or update any such forward-looking information or to publicly announce the result of any revisions to any of the forward-looking information contained herein to reflect future results, events or developments, except as required by law.

The Canadian Securities Exchange (CSE) does not accept responsibility for the adequacy or accuracy of this release.
