

Silver North Resources Ltd. Planning Main Fault Follow-Up Drilling at Haldane Silver Property, Yukon

30.07.2025 | [The Newswire](#)

- Ten holes to follow up 2024 Main Fault discovery, testing down-dip and strike potential.
- Targeting mid-August program start up.

[Silver North Resources Ltd.](#) (TSX-V: SNAG, OTCQB: TARSF) "Silver North" or the "Company") announces the details of the 2025 exploration program at the Company's flagship Haldane Property in the historic Keno Hill Silver District, Yukon.

"We are excited to commence the 2025 program at Haldane, to expand upon our discovery at the Main Fault in 2024," stated Jason Weber, P.Geol., President and CEO of Silver North. "With high grade silver intersections of 1.83 metres (true width) averaging 1,088 g/t silver and 3.90 g/t gold as well as wider intersections of silver mineralization such as 5.81 metres (true width) averaging 365 g/t silver and 0.23 g/t gold, the Main Fault has elevated to the highest priority of our five drill targets."

The ten hole (~2,500 metres) diamond drilling program will target expansion of Keno-style silver lead-zinc mineralization at the newly identified Main Fault target, a wide zone with at least three high grade silver veins identified to date. One hole will test the continuity of mineralization approximately 60 m down dip of the HLD24-30 intersection. The remaining holes, subject to in-field adjustments due to logistical consideration or visual results, will consist of fans of 3 holes on sections approximately 50 and 100 metres southwest and 50 metres northeast of the discovery section to test the strike and depth continuity of mineralization (Figures 1, 2). Time and budget permitting, one hole may also be completed at the Bighorn target, following up on silver-bearing quartz-siderite-galena veins intersected in the only drillhole at Bighorn.

Silver North has engaged Paycore Diamond Drilling as the drill contractor for the program and Hardline Exploration Services Ltd, to provide staffing and camp support. The program is expected to commence in mid-August.
