

Neotech Metals Commences Drilling at Its TREO Project in British Columbia

31.07.2025 | [Newsfile](#)

Vancouver, July 31, 2025 - [Neotech Metals Corp.](#) (CSE: NTMC) (OTCQB: NTMFF) (FSE: V690) ("Neotech" or "the Company") is pleased to announce that field crews are mobilizing this week to commence the inaugural exploration drilling program at its 100%-owned TREO Project, located in the heart of British Columbia's emerging Wicheeda Rare Earth District.

The initial drill program will test high-priority targets identified through detailed regional sampling and mapping campaigns. These targets are designed to confirm high-grade, near-surface mineralized zones, including bedrock grab samples returning up to 28.97% Total Rare Earth Oxides (TREO**) and 2.91% Nb²O₃;

The planned drill holes (see Figure 1) are strategically positioned to evaluate mineralized corridors within Neotech's mineral tenures and to better understand their relationship to the nearby Wicheeda Rare Earth deposit currently being advanced by Defense Metals.

Figure 1 - Map showing rough drill hole locations along the 2024 mapping and prospecting sample results and adjacent [Defense Metals Corp.](#) proposed pit shell.

"I'm excited to advance exploration within such a highly prospective and strategically significant district," commented Reagan Glazier, CEO & Director of Neotech Metals. "This drill program is a key step toward unlocking the TREO Project's full potential and establishing its geological and strategic connection to one of Canada's most significant rare earth developments."

ON BEHALF OF THE BOARD

Reagan Glazier

Chief Executive Officer and Director

Neotech Metals Corp.

*Independent Preliminary Economic Assessment, Wicheeda Rare Earth Project, prepared by SRK Consulting, January 2022 - <https://minedocs.com/22/Wicheeda-PEA-01062022.pdf>

**TREO (Total Rare-Earth Oxides) has been used to express the results in the press release. TREO is calculated by converting the elemental ppm to Rare-Earth Oxides using a conversion factor and is the summation of CeO₂ + La₂O₃ + Pr₆O₁₁ + Nd₂O₃ + Sm₂O₃ + Eu₂O₃ + Gd₂O₃ + Tb₄O₇ + Dy₂O₃ + Ho₂O₃ + Er₂O₃ + Tm₂O₃ + Yb₂O₃ + Lu₂O₃ + Y₂O₃.

Qualified Person

Technical Information for this news release has been prepared in accordance with the Canadian regulatory requirements set out in National Instrument 43-101. Jared Galenzoski VP Exploration, P.Geo., and Qualified Person, has reviewed and approved all of the data and statements made for this news release.

About the Neotech Metals

Neotech Metals is a mineral exploration company dedicated to discovering and developing mineral resources

within promising jurisdictions around the world. With a strong commitment to environmental stewardship and sustainable practices, Neotech is positioned to make a positive impact while maximizing the potential of its exploration properties.

The company has a diversified portfolio of rare earth element and rare metals projects, including the apatite-hosted rare earth project, Hecla-Kilmer, located 20 kilometres from the Otter Rapids 180-megawatt hydroelectric power generation station and active Ontario Northway railway, along with its TREO and Foothills projects located in British Columbia. All three projects are 100 per cent wholly owned.
