

# Integral Metals Provides Update on 2025 Drilling at the KAP Project

12.08.2025 | [GlobeNewswire](#)

CALGARY, Aug. 12, 2025 - [Integral Metals Corp.](#) (CSE: INTG | OTC: ITGLF | FSE: ZK9) (the "Company" or "Integral") is pleased to provide an update on its 2025 diamond drilling program at the KAP Project in the Northwest Territories. As previously announced on July 28, 2025, the Company commenced mobilization for the program, and operations are now fully underway with drilling of the first hole complete to a depth of 86 meters, and the second hole currently in-progress.

The Company plans to complete a staged program of approximately six diamond drill holes. The campaign is designed to test high-priority extensions of historically drilled and trenched high-grade lead-zinc zones surrounding the Main Showing area, and to evaluate the distribution of gallium and germanium within sphalerite host rock.

The first pad location has been selected to test the central portion of the Main Showing to provide an early benchmark for mineralization and geometry. Additional holes are tentatively planned to step out, with the objective of refining the understanding of the Main Showing's dimensions and lateral continuity.

The second pad has been designed to evaluate the mineralization along and to the north of historical hole F-96-05. The holes from this location will attempt to extend the strike to the north and investigate the contrasting results between historical holes F-96-05 (a wide anomalous zone) and F-96-06 (which missed mineralization), probing alteration patterns, lithological changes, fractures, and structural features.

Paul Sparkes, CEO of Integral Metals, commented: "With drilling now underway at the KAP Project, we are pleased to be advancing into this next phase of exploration. The program has been designed to provide valuable early insights into the mineralized system while also testing step-out targets that could expand the known zones at the Main Showing."

The drilling sequence has been designed to be flexible and decision-based, with results from early holes guiding subsequent targeting. Further updates will be provided as drilling continue.

## Qualified Person

The scientific and technical content of this news release has been reviewed, verified, and approved by Jared Suchan, Ph.D., P.Geol., VP of Exploration at the Company, and a "Qualified Person" as defined by National Instrument 43-101.

For a discussion of the Company's QA/QC and data verification procedures and processes, please see the technical report entitled, Technical Report on the KAP Property, Mackenzie Mountains, Northwest Territories, Canada, a copy of which may be obtained under the Company's profile at [www.sedarplus.ca](http://www.sedarplus.ca).

ABOUT INTEGRAL METALS CORP.

Integral is an exploration stage company, engaged in the business of mineral exploration for critical minerals, including gallium, germanium, and rare earth elements, with the goal of contributing to the development of a domestic supply chain for these minerals. Integral holds properties in mining-friendly jurisdictions in Canada and the United States of America, including the Northwest Territories, Manitoba and Montana, where it has received regulatory support for its exploration efforts.

#### Forward-Looking Information

*Certain statements contained in this press release constitute forward-looking information. These statements relate to future events or future performance. The use of any of the words "could", "intend", "expect", "believe", "will", "projected", "estimated" and similar expressions and statements relating to matters that are not historical facts are intended to identify forward-looking information and are based on the Company's current beliefs or assumptions as to the outcome and timing of such future events. In particular, this press release contains forward-looking information relating to, among other things, the Company's future plans and prospects, including with respect to the planned drilling program.*

*Various assumptions or factors are typically applied in drawing conclusions or making the forecasts or projections set out in forward-looking information, including, in respect of the forward-looking information included in this press release, assumptions regarding the future plans and strategies of the Company, including its ability to complete the planned drilling program as intended.*

*Although forward-looking information is based on the reasonable assumptions of the Company's management, there can be no assurance that any forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include, among other things, the risk that the Company may be unable to complete the drilling program as planned, and that the Company's business prospects and priorities may change, whether as a result of unexpected events, general market and economic conditions or as a result of the Company's future exploration efforts, and that any such change may result in a re-deployment of the Company's resources and efforts in a manner divergent from the Company's current business plan or strategy. The forward-looking information contained in this release is made as of the date hereof, and the Company is not obligated to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable securities laws. Because of the risks, uncertainties and assumptions contained herein, investors should not place undue reliance on forward-looking information. The foregoing statements expressly qualify any forward-looking information contained herein.*
