# Pacific Empire Retains Omineca Drilling for September Diamond Drill Program at Trident Copper-Gold Property

21.08.2025 | Newsfile

Pacific Empire Minerals Corp. (TSXV: PEMC) ("Pacific Empire", "PEMC" or the "Company"), a British Columbia copper-gold explorer, is pleased to announce that it has retained Omineca Drilling Ltd. ("Omineca") to complete a diamond drill program at its 100%-owned Trident property in north-central British Columbia. Drilling is scheduled to commence in September 2025.

#### Key Highlights

- Omineca Drilling retained to complete a ~2,500-metre diamond drill program at Trident.
- Omineca previously drilled the property in 2014, bringing valuable familiarity and efficiency to the upcoming program.
- Road re-establishment underway with an excavator clearing and preparing access ahead of drilling.
- Multi-Year Mines Act Permit secured, authorizing surface drilling from 20 permitted drill sites until September 2028.

In advance of drilling, Pacific Empire has mobilized an excavator to the Trident property to begin clearing and re-establishing existing roads in preparation for the 2025 exploration program. These activities will ensure efficient access to drill sites and support the safe and timely commencement of diamond drilling.

"We are excited to be working with Omineca Drilling once again at Trident," commented Brad Peters, President and CEO of Pacific Empire. "Omineca, which previously drilled the property in 2014, brings valuable familiarity and efficiency to the upcoming program. Combined with our recently granted multi-year exploration permit and improved access, we have an excellent foundation as we prepare to launch our diamond drill program at Trident this September."

The Trident property lies within the prolific Quesnel Terrane, immediately south of the Hogem Plutonic Suite contact with volcanic rocks of the Chuchi Lake Succession - a geologic setting known to host several producing and past-producing copper-gold porphyry deposits in British Columbia. Historical work on the property includes soil geochemistry, geophysics, and diamond drilling that confirmed widespread copper-gold mineralization but left the main target area untested due to historic access challenges.

Pacific Empire's 2025 program will be the first modern drill campaign to directly test this high-priority target, following recent re-assay results from historical drilling and the acquisition of new high-resolution LIDAR data that have refined drill collar placement.

#### Forward-Looking Statements

Information set forth in this news release may involve forward-looking statements under applicable securities laws. Forward-looking statements are statements that relate to future, not past, events. In this context, forward-looking statements often address expected future business and financial performance, and often contain words such as "anticipate", "believe", "plan", "estimate", "expect", and "intend", statements that an action or event "may", "might", "could", "should", or "will" be taken or occur, or other similar expressions. All statements, other than statements of historical fact, are forward-looking statements. By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following risks: the need for additional financing; operational risks associated with mineral exploration; fluctuations in commodity prices; title matters; environmental liability claims and insurance; reliance on key personnel; the potential for conflicts of interest among certain officers, directors or promoters with certain other projects; the absence of dividends; competition; dilution; the volatility of our common share price and volume and the additional risks identified in the management discussion and analysis section of our interim and most recent annual financial statement or other reports and filings with the TSX Venture Exchange and applicable Canadian securities regulations. Forward-looking statements are made based on management's beliefs, estimates and opinions on the date that statements are made, and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, except as required by applicable securities laws. Investors are cautioned against attributing undue certainty to forward-looking statements.
