- Technical programs moving directly to definitive Feasibility, targeting operations by end of 2026; conversations underway with financiers for low-dilution credit financing options

ADELAIDE, September 7, 2025 - [Barton Gold Holdings Ltd.](#) (ASX:BGD)(FRA:BGD3)(OTCQB:BGDFF) (Barton or Company) is pleased to announce an updated MRE for its South Australian Challenger Gold Project (Challenger). This follows detailed remodelling of gold mineralisation on or near existing development drives within the historical Challenger underground mine (below the 900mRL level). This mineralisation was temporarily removed from Barton's recent 30 June 2025 Challenger MRE update, pending final remodelling and re-estimation.

Full details are contained in the complete announcement, which can be accessed on the ASX website, the investor section of Barton's website, or directly by clicking [here](#).

Commenting on the Challenger JORC Resources update, Barton MD Alexander Scanlon said:

"With gold Resources of over 300,000oz now confirmed adjacent to the Central Gawler Mill, the pieces are now in place for the startup of an initial multi-year 'Stage 1' operation. This represents a significant opportunity for Barton to join a select few of its peers by transitioning to operations at a period of record high gold prices.

"Our fully permitted Central Gawler Mill also offers considerable leverage in successfully delivering this outcome, with a potentially shorter, lower-cost, and lower-risk pathway to operations and BGD's re-rating to 'producer' status. A successful outcome could then generate revenues and cash flow to fund our planned regional growth.

"We are now moving directly to definitive Feasibility studies targeting a two phase, de-risked development

and the start of initial 'Stage 1' operations by the end of 2026. Barton has a very exciting 18 months ahead as we navigate this next stage of our corporate evolution."
