

Surge Energy America Announces Completion of Seventeen Well Farm-In Development

09.09.2025 | [PR Newswire](#)

Surge Energy US Holdings Company ("Surge Energy" or the "Company") today announced it has delivered and finalized a 17 well farm-in transaction that earns acreage and production in Howard County.

In August, the Company brought online the final wells of the 17 well development in Howard County which earns acreage and production from the previous operator by carrying the full cost of drilling, completion, and connecting to production. The Company began drilling this development in early 2025 in a new operating area for the Company referred to internally as Howard South.

This is the third farm-in transaction in recent years for Surge Energy.

"This development gave Surge the opportunity to apply our low-cost development expertise in an area nearby our Moss Creek asset," stated Senior Vice President of Development and Operations, Chris Alonzo. "These farm-in opportunities are a direct result of our reputation of being a strong operator and delivering on our commitment, as well as a creative way of adding to our drillable inventory."

"Surge has a strong track record of growing its assets and inventory through a multi-faceted strategy of acquisitions, bolt-ons, grass roots leasing, and organic growth," stated Chief Financial Officer Travis Guidry. "This farm-in opportunity is the latest example of the Surge team's creative approach to growth."

About Surge Energy

Surge Energy is an independent oil and natural gas company focused on the development, exploitation, production and acquisition of oil and natural gas reserves in the Midland Basin of West Texas, one of three primary sub-basins of the Permian Basin. The Company is headquartered in Houston, Texas, and currently holds approximately 180,000 net acres in the Permian Basin as of September 9, 2025.
