

Colibri Resource Corporation Advances Growth Strategy to Unlock Value at EP Gold Project and Pilar Joint Venture

16.09.2025 | [Newsfile](#)

Dieppe, September 16, 2025 - [Colibri Resource Corp.](#) (TSXV: CBI) (OTC Pink: CRUCF) (FSE: 2CO1) ("Colibri" or the "Company") is pleased to provide a corporate update, outlining near-term initiatives to advance its 100%-owned EP Gold Project and highlight the significant potential of its 49% interest in the advanced Pilar Gold-Silver Project in Sonora, Mexico.

Positioned for Growth in a Strong Precious Metals Market

With gold and silver trading near historic highs, Colibri is actively advancing initiatives designed to increase shareholder value. The Company is pursuing a staged growth strategy focused on:

- Advancing exploration at EP Gold,
- Supporting development of Pilar, and
- Strengthening market visibility and corporate positioning.

EP Gold Project - District-Scale Potential in the Heart of the Caborca Belt

Colibri's 100%-owned EP Gold Project (Evelyn/Plomo) covers 4,766 hectares in the Caborca Gold Belt of Sonora, Mexico - one of the country's most prolific mining districts. The Project is strategically located within 25 kilometres of some of Fresnillo Plc's most significant gold operations, including the producing La Herradura Mine and Noche Buena Mine, as well as the Tajitos deposit (which is reportedly undergoing an updated Preliminary Economic Assessment).

Work completed to date includes over 12,000 metres of drilling¹, more than 2,500 surface samples with abundant high-grade gold values², and geophysical surveys covering over 1,000 hectares³. Yet, only three of ten high-priority targets have been drill tested¹, leaving considerable exploration upside.

Colibri is preparing for the next stage of work at EP, which will include:

- Drill testing new zones,
- Expanding areas of known mineralization, and

- Applying modern exploration technologies to evaluate the full property and assess additional historical workings for further potential.

These initiatives highlight the opportunity for EP to emerge as a district-scale gold discovery in one of Mexico's most proven belts. Colibri expects to update investors on the next phases of exploration at EP over the coming months.

Pilar JV

Colibri holds a 49% interest in the Pilar Gold-Silver Project, operated by Tocvan Ventures (CSE: TOC). Pilar has been advanced through >24,000 metres of drilling, trenching, and surface work; as well as a 1,400-tonne bulk sample completed in 2023 that returned an average head grade of 1.9 g/t Au with recoveries of ~63% using simple heap leach methods. Follow-up metallurgical test work demonstrated rapid gold recovery potential of 95-99% under agitated leach conditions.

In August 2025, Tocvan secured permits for a 50,000-tonne pilot mine facility approximately 1 km from Pilar. While decisions on allocation of JV material remain under review, the facility provides a compelling option for larger-scale testing. Pilar is believed to host sufficient mineralized material to support the full 50,000-tonne test, positioning the project for a meaningful demonstration of its potential. The facility offers a timely and strategic opportunity for larger-scale evaluation of Pilar while gold prices remain near record highs.

Near-term catalysts for Pilar include:

- Initiation of the 50,000-tonne pilot bulk sample program,
- Delivery of a maiden resource estimate, and
- Completion of a Preliminary Economic Assessment (PEA).

Strengthening the Balance Sheet & Market Awareness

To support these project milestones, Colibri is advancing a broader corporate strategy that includes:

- Debt Conversion/New Debenture: With previous debentures now expired, the Company is encouraging holders to convert outstanding debt into equity or participate in a new debenture financing under revised conditions.
- Equity Financing: Evaluating financing options to ensure Colibri is well funded to advance exploration and corporate objectives.
- Marketing Initiatives: Targeted campaigns designed to expand visibility and attract new investor interest.

Additional updates on these initiatives are expected in the near term.

Management Commentary

"Colibri is executing a clear, staged growth plan at an opportune time for precious metals," said Ian McGavney, President & CEO. "With district-scale exploration potential at EP and Pilar advancing toward development with infrastructure now permitted nearby, Colibri is well positioned to deliver meaningful value for shareholders."
