

Noble Plains Uranium Corp. Increases Private Placement to \$1,040,040

18.09.2025 | [Newsfile](#)

[Noble Plains Uranium Corp.](#) (TSXV: NOBL) (FSE: INE0) ("Noble Plains" or the "Company") is pleased to announce that, due to strong investor demand, it has increased the size of its non-brokered private placement, previously announced on September 17, 2025 (the "Offering"). The Company will now issue up to 11,556,000 units (each, a "Unit") at a price of \$0.09 per Unit for gross proceeds of up to \$1,040,040. Each Unit will be comprised of one common share of the Company (each, a "Share") and one-half of one common share purchase warrant. Each whole warrant (each, a "Warrant") will entitle the holder to acquire one additional Share at a price of \$0.15 per Share for a period of two years from the date of issuance. All other terms of the Offering, as disclosed in the Company's September 17, 2025 news release, remain unchanged.

The Offering remains subject to the final acceptance of the TSX Venture Exchange.

This press release does not constitute an offer to sell or a solicitation of an offer to buy any of the securities in the United States. The securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), or any state securities laws and may not be offered or sold within the United States or to or for the account or benefit of a "U.S. person" (as defined in Regulation S under the U.S. Securities Act) unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.

About Noble Plains Uranium

Noble Plains Uranium Corp. is a U.S.-focused uranium exploration and development company advancing a portfolio of high-potential projects amenable to In Situ Recovery (ISR) - the most capital-efficient and environmentally responsible method of uranium extraction. Our strategy targets historically drilled and underexplored assets in proven jurisdictions, with the objective of rapidly delineating NI 43-101-compliant resources and building a scalable inventory of domestic uranium.
