"Great Atlantic comes with a history of tungsten experience. Both Dave Martin, the VP, and myself were instrumental in bringing the Sisson Brook Tungsten-Moly project at Norcliff (NCF) to pre-feasibility, which is now moving towards production. Previously, we created a show called Talking Tungsten that highlighted the attributes of tungsten to the general public. Over the past decade, Dave and I have assembled a high-quality package of tungsten assets in New Brunswick and Newfoundland. We own 100% of these assets under Great Atlantic and are now seeking partners to advance the projects, while we focus our primary efforts on developing the Golden Promise Mine-assets on which we are currently conducting a bulk sample." - Anderson, CEO

The Flume Ridge mineral claim is one of eight mineral claims located in southwest New Brunswick, the claims comprising the Southwest New Brunswick Tin - Tungsten Property. These mineral claims were acquired by Great Atlantic through a purchase agreement (see Company news release of March 7, 2025).

The Flume Ridge claim hosts the Flume Ridge Tungsten mineral occurrence with scheelite reported in quartz veins (New Brunswick Department of Natural Resources and Energy Development, Mineral Occurrence Database, Reference No. 1448). Two 2009 drill holes within the southern region of the claim were reported to intersect 0.608% tungsten (0.76% WO₃) over 0.57 meters (core length) and 0.557% tungsten (0.70% WO₃) over 0.65 meters core length. Four 2009 trenches - stripped areas were reported to expose tungsten (scheelite) bearing quartz veins. A bedrock grab sample reported during 2018 from one of these trenches was reported to return 1.58% tungsten (1.99% WO₃). A float boulder sample reported during 2020 from the southern region of the claim was reported to return 1.66% tungsten (2.09% WO₃).

Great Atlantic collected 28 rock samples during the spring - summer 2025 program at the Flume Ridge claim. The samples were collected from float boulders, subcrop and outcrop exposures including some samples from the historic trenches - stripped areas (excavated during 2009). A few of the rock samples from a shallow historic trench - stripped area contain scheelite mineralization as per scans of the rock samples by Company representatives using an ultraviolet lamp. Some rock samples from subcrop and outcrop in the southern region of the claim are highly altered (including silicification) and contain sulfide mineralization (pyrite present).

Readers are warned that Great Atlantic has not verified historically reported tungsten analytical results for the area of the Flume Ridge claim. The 2025 rock samples have not been analyzed. Great Atlantic plans to submit the samples to a certified, independent laboratory for gold and multi-element (which will include tungsten analysis).

David Martin, P.Ge., (New Brunswick and Newfoundland and Labrador), a Qualified Person as defined by

NI 43-101 and VP Exploration for Great Atlantic, approved the technical information contained in this News Release.

The Company also reports that further to its financing news release of May 1, 2025, the placement has now been closed, and no further shares will be issued. The Company previously closed a tranche of the non-brokered private placement, consisting of 1,764,707 flow through units at a price of \$0.085 per share for gross proceeds of \$150,000. Each whole warrant will entitle the holder to purchase one additional non-flow common share at the price of \$0.12 for 24 months after closing. All securities issued in connection with the first tranche of the flow through shares will be subject to a hold period of October 11, 2025.

The Company had also closed a tranche of the hard dollar portion consisting of 1,536,542 units for gross proceeds of \$99,875. The units of the financing will comprise of one common share and one share purchase warrant. Each whole warrant will entitle the holder to purchase one additional common share at the price of \$0.10 for 24 months after closing. All securities issued in connection with the first tranche of these hard dollar shares will be subject to a hold period of October 6, 2025.

The Company will not be proceeding with the remaining portion of this financing.

On Behalf of the board of directors
