

Renforth Resources Inc. Attending Munich Mining Conference, Company Update

22.09.2025 | [The Newswire](#)

[Renforth Resources Inc.](#) (CSE: RFR) (OTC: RFHRF) (FSE: 9RR) ("Renforth" or the "Company"), is pleased to advise shareholders that Renforth will have a booth at the Munich Mining Conference, October 3rd and 4th, and presenting to conference attendees on October 4th at 10am local time. The conference has 109 companies attending and more than 1,000 individual investors registered to attend. If you are in attendance, please stop by booth #11 and say hello.

Renforth's recent efforts have been directed towards advancing our maiden Mineral Resource Estimate (MRE) for the Victoria mineralized system where we are working to declare a maiden nickel polymetallic resource over the ~2.5km of strike we have drilled within the ~20km long Victoria structure. As previously stated, the release of this estimate is anticipated in the fall.

In addition, we have obtained new detailed geophysical data covering an area just east of our Beaupré discovery on our Malartic Metals Package property, as well as a portion of our Parbec gold deposit, covering the northwestern part of the property. This data covers nearly half of the Cadillac Break within the property, and importantly, the Pontiac sediments to the south of the Break, which incorporate the Diorite splay and our permitted stripping location. Renforth obtained this data as we allowed our neighbor to fly over our ground, simplifying their survey work, in exchange for the information at no cost. This new data is being integrated into our project data and evaluated.

The technical contents of this press release have been reviewed and approved by Francis Newton P. Geo OGQ, a "qualified person" pursuant to the requirements set out in NI 43-101.

Forward-Looking Statements

This news release contains forward-looking statements and information under applicable securities laws. All statements, other than statements of historical fact, are forward looking. Forward-looking statements are frequently identified by such words as "may," "will," "plan," "expect," "believe," "anticipate," "estimate," "intend" and similar words referring to future events and results. Such statements and information are based on the current opinions and expectations of management. All forward-looking information is inherently uncertain and subject to a variety of assumptions, risks and uncertainties, including the speculative nature of mineral exploration and development, fluctuating commodity prices, the risks of obtaining necessary approvals, licenses and permits and the availability of financing, as described in more detail in the Company's securities filings available at www.sedar.com. Actual events or results may differ materially from those projected in the forward-looking statements and the reader is cautioned against placing undue reliance thereon. Forward-looking information speaks only as of the date on which it is provided, and the Company assumes no obligation to revise or update these forward-looking statements except as required by applicable law.
