ABOUT FIRST HELIUM

Led by a core Senior Executive Team with diverse and extensive backgrounds in Oil & Gas Exploration and Operations, Mining, Finance, and Capital Markets, First Helium seeks to be one of the leading independent providers of helium gas in North America.

First Helium holds over 53,000 acres along the highly prospective Worsley Trend in Northern Alberta which has been the core of its exploration and development drilling activities to date.

Building on its successful 15-25 helium discovery well, the 1-30 and 4-29 oil wells, and its recent Charlie Lake shallow heavy oil discovery at the Worsley project, the Company has identified numerous follow-up drill locations and acquired an expansive infrastructure system to facilitate future exploration and development across its Worsley land base. Cash flow from its successful oil wells at Worsley has helped support First Helium's ongoing exploration and development growth strategy. Further potential oil drilling locations, including the development of the shallow heavy oil play, have also been identified on the Company's Worsley land base.
