

Desert Mountain Energy To Support Carbon Capture At Roswell Data Centre; Ceo Appointed To Advisory Board

24.09.2025 | [CNW](#)

TSX.V: DME
U.S. OTC: DMEHF
Frankfurt: QM01

[Desert Mountain Energy Corp.](#) (the "Company") (TSXV: DME) (U.S. OTC: DMEHF) (Frankfurt: QM01) from the President of the Company. DME is pleased to announce that Chief Executive Officer Robert Rohlfiing has been appointed to the Advisory Board of Roswell Information Park LLC, where the Company will work alongside Sustany LLC, the developer of a new AI-focused data center campus in Roswell, New Mexico.

In addition to his advisory role, DME has been invited to participate in the development and implementation of carbon capture solutions connected to power generation for the data center. This initiative aligns with DME's strategy to integrate sustainable practices into its energy operations while supporting advanced technology infrastructure.

"We are honored to play a role in shaping the future of the Roswell Information Park," said Robert Rohlfiing, CEO of Desert Mountain Energy. "Our work with helium and natural gas positions us to contribute meaningfully to both the energy supply and the long-term sustainability of this project. Incorporating carbon capture is a critical step in ensuring that the data center's energy footprint remains responsible while meeting the growing demands of AI computing."

The Roswell Information Park project represents a major investment in southeastern New Mexico, designed to support AI and high-performance computing with a dedicated natural gas supply and advanced infrastructure.

Update on Arizona Supreme Court Decision

As previously announced, the Arizona Supreme Court denied the City of Flagstaff's petition for review of the March 4, 2025, Arizona Court of Appeals decision in *City of Flagstaff v. Desert Mountain Energy Corp.* Following consultation with corporate counsel, the Company will not be providing any further comments on this matter at this time.

ABOUT DESERT MOUNTAIN ENERGY

Desert Mountain Energy Corp. is a publicly traded resource company primarily focused on the exploration, development and production of helium, hydrogen and natural gas. The Company is focused on helium extraction from different raw gas sources in an environmental and economic manner, supplying elements deemed critical to the renewable energy and high technology industries.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in polices of

the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release. The statements made in this press release may contain certain forward-looking statements that involve a number of risks and uncertainties. Actual events or results may differ from the Company's expectations.

Cautionary Note Regarding Forward-Looking Statements

This news release contains "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and "forward-looking information" within the meaning of applicable Canadian securities legislation. Such forward looking statements and information herein include but are not limited to statements regarding the Company's anticipated performance in the future the planned exploration activities, receipt of positive results from drilling, the completion of further drilling and exploration work, and the timing and results of various activities.

Forward-looking statements or information involve known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company and its operations to be materially different from those expressed or implied by such statements. Such factors include, among others, changes in national and local governments, legislation, taxation, controls, regulations and political or economic developments in Canada and the United States; financial risks due to helium prices, operating or technical difficulties in exploration and development activities; risks and hazards and the speculative nature of resource exploration and related development; risks in obtaining necessary licenses and permits, and challenges to the Company's title to properties.

Forward-looking statements are based on assumptions management believes to be reasonable, including but not limited to the continued operation of the Company's exploration operations, no material adverse change in the market price of commodities, and such other assumptions and factors as set out herein. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or information, there may be other factors that cause results to be materially different from those anticipated, described, estimated, assessed or intended. There can be no assurance that any forward-looking statements or information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements or information. Accordingly, readers should not place undue reliance on forward-looking statements or information. The Company does not intend to, and nor does not assume any obligation to update such forward-looking statements or information, other than as required by applicable law.
