About Palisades Goldcorp Ltd.

Palisades Goldcorp Ltd. is a Canadian company incorporated in the province of British Columbia acting primarily as a resource investment company and merchant bank focused on junior companies in the resource and mining sector. The Company seeks to acquire equity participation in pre-initial public offering and early-stage public resource companies with undeveloped or undervalued high quality projects. The Company focuses on companies that are in need of financial resources to realize their full potential, are undervalued in capital markets, and/or operate in jurisdictions with low to moderate local political risk. The Company is focused on providing retail and institutional investors with exposure in the junior resource space. The Company primarily expects to continue to make investments, pursuant to its dual investment strategy, to achieve broad sector exposure with upside in the event of appreciation in mineral commodities prices, while also providing the potential to realize appreciation in net asset values as a result of discoveries by issuers in which the Company holds larger positions. At present, and after the acquisition of Palisades Investments Ltd (formerly [Radio Fuels Energy Corp.](#)) in February 2025, Palisades has a portfolio of equity investments, or securities convertible into equity investments, in over 125 junior resource issuers. Through subsidiaries, Palisades holds exploration properties in Nevada and a uranium exploration property in Canada. The Company owns 100% of Made in America Gold Corp., which ranks as the largest junior mineral claim holder in the State of Nevada, as well as 100% of Radio Fuels Resources Corp., which owns the Eco Ridge Uranium Project in Elliot Lake, Ontario. The common shares of the Company are listed and posted for trading on the TSXV under the symbol "PALI". Palisades' management team identifies highly prospective assets in politically safe jurisdictions and seeks to unlock their value by providing strategic investments, proven technical skills, global knowledge, and increased access to industry relationships.
