

Amex Exploration Inc.: CEO Victor Cantore on Feasibility, Gold Expansion and Production Path in Quebec - Ellis Martin Report

08.10.2025 | [ABN Newswire](#)

In this new episode of The Ellis Martin Report and Money Talk Radio, host Ellis Martin speaks with Victor Cantore, President and CEO of [Amex Exploration Inc.](#) (CVE:AMX) (OTCMKTS:AMXEF) - one of Quebec's most exciting near-term gold producers.

The company's 100%-owned Perron Gold Project in Quebec's Abitibi Greenstone Belt continues to generate exceptional results across multiple high-priority zones as it moves toward production.

Project Highlights

- Feasibility Study Underway: Phase One (toll milling) feasibility on track for completion in H1 2026, putting Amex on course to become a near-term producer.

- Production Metrics: Expected 102,000 oz/year, with the first 10 years averaging 112,000 oz at \$1,165/oz AISC.

- Economics:

CapEx: CA\$146M (pre-production estimate now reduced to CA\$77M)

Pre-tax NPV (at \$3,400 gold): ~CA\$5B

IRR: 107% at \$3,400 gold

Payback: 0.4 years after tax (~5 months)

Even at \$2,000 gold, payback remains just 2 years

- Infrastructure Advantage: Located 5 km from town - close to workforce, power, and water, yet far enough to minimize disturbance.

- Land Control: 200 km² total, including 35 km of strike length in the Greenstone Belt - one of the richest gold corridors in the world.

- Exploration Growth: Over 100,000 meters funded through 2026 via recent flow-through financing.

- Market Momentum: Share price nearly doubled in Q3 2025; market cap ~CA\$400M vs. NPV ~CA\$1.9B - strong upside potential.

- Quote from Victor Cantore

"We're on schedule, funded, and executing. The project economics, jurisdiction, and infrastructure make this one of the best-positioned gold stories in Canada right now."
