

# Nevada Organic Phosphate Inc. Provides Drilling Campaign Update

09.10.2025 | [Newsfile](#)

[Nevada Organic Phosphate Inc.](#) (CSE: NOP) ("NOP" or the "Company"), a B.C. based leader in organic sedimentary phosphate exploration, is pleased to report that its wholly owned subsidiary, Nevagro LLC ("Nevagro"), has made significant progress in advancing operations at the Murdock Mountain rock phosphate project. The Company's upcoming 12-hole maiden diamond drilling program will test key targets across Area A of the Nevagro lease.

This week, the Company:

- engaged local equipment operators to upgrade access roads leading to designated drill sites;
- signed a contract with a drilling company to execute 1,500 metres (~5,000') of HQ-diameter diamond drilling from 12 designated locations targeting depths between 100 and 250 meters; and
- leased a warehouse and field office in Elko, Nevada, to facilitate ongoing drill-core logging, sample processing, and future field activities.

Robin Dow, CEO, commented on the current operational status: "Our Geologists, Garry Smith and Marco Montecinos, have made very significant strides forward to securing NOP's active drill program in a very short time. With ample funding in place, NOP expects to be on the ground within a week or so. This is it, what we have been waiting 13 years for!"

Nevada Organic Phosphate Inc.

NOP is a junior exploration company with an organic sedimentary raw rock phosphate bed, 6.6 kilometres long, in northeast Nevada. Additional applications extend the potential strike of rock phosphate to over 30 kilometres. This is believed to be the only known large-scale organic sedimentary phosphate project in North America. It is situated close to the main highway to Montello/Elko, Nevada, and near the rail head to California.
