

American Critical Minerals Announces \$4.0 Million Bought Deal Offering and Concurrent \$2.0 Million Non-Brokered Private Placement

16.10.2025 | [Newsfile](#)

Vancouver, October 15, 2025 - [American Critical Minerals Corp.](#) (CSE: KCLI) (OTCQB: APCOF) (FSE: 2P30) ("American Critical Minerals" or the "Company") is pleased to announce that it has entered into an agreement with Research Capital Corporation as the sole underwriter and sole bookrunner, (the "Underwriter"), pursuant to which the Underwriter has agreed to purchase, on a bought deal basis, 11,429,000 units of the Company (the "Units") at a price of \$0.35 per Unit (the "Offering Price") for aggregate gross proceeds to the Company of \$4,000,150 (the "Offering").

In addition, the Company is also pleased to announce a concurrent non-brokered private placement of up to 5,714,286 Units at a price of \$0.35 per Unit for gross proceeds of up to \$2,000,000 (the "Non-Brokered Private Placement"). Together with the Offering and the Non-Brokered Private Placement, the Company expects to raise aggregate gross proceeds of up to \$6,000,000.

Each Unit shall be comprised of one common share of the Company (a "Common Share") and one-half of one Common Share purchase warrant of the Company (each whole warrant, a "Warrant"). Each Warrant shall entitle the holder thereof to purchase one Common Share at an exercise price of \$0.45 per Common Share for a period of 36 months following closing of the Offering, provided that holders will not be permitted to exercise Warrants until 60 days following closing of the Offering.

The net proceeds from the Offering of the Units will be used for working capital and general corporate purposes.

The Company has granted to the Underwriter an option (the "Underwriters' Option") to increase the size of the Offering by up to an additional number of Units, that in aggregate would be equal to 15% of the total number of Units to be issued under the Offering, exercisable at any time up to 48 hours prior to the closing of the Offering.

The Units to be issued under the Offering and the Non-Brokered Private Placement will be offered for sale pursuant to the listed issuer financing exemption under Part 5A of National Instrument 45-106 - Prospectus Exemptions, as amended by CSA Coordinated Blanket Order 45-935 - Exemptions from Certain Conditions of the Listed Issuer Financing Exemption (collectively, the "Listed Issuer Financing Exemption"), in all provinces of Canada, except Quebec, and other qualifying jurisdictions, including the United States. The Units offered under the Listed Issuer Financing Exemption will be immediately "free-trading" under applicable Canadian securities laws.

There is an offering document (the "Offering Document") related to this Offering and Non-Brokered Private Placement that can be accessed under the Company's profile at www.sedarplus.ca and at the Company's website at www.acmineralscorp.com. Prospective investors should read this Offering Document before making an investment decision.

The closing of the Offering and the Non-Brokered Private Placement are expected to occur on or about the week of October 27, 2025 (the "Closing"), or such other earlier or later date as the Underwriter may determine. Closing is subject to the Company receiving all necessary regulatory approvals, including the conditional approval of the Canadian Securities Exchange.

The Underwriter will receive a cash commission of 7.0% of the aggregate gross proceeds of the Offering and such number of broker warrants (the "Broker Warrants") as is equal to 7.0% of the number of Units sold

under the Offering. Each Broker Warrant entitles the holder to purchase one Unit at an exercise price equal to the Offering Price for a period of 36 months following the Closing.

This press release is not an offer to sell or the solicitation of an offer to buy the securities in the United States or in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to qualification or registration under the securities laws of such jurisdiction. The securities being offered have not been, nor will they be, registered under the United States Securities Act of 1933, as amended, and such securities may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons absent registration or an applicable exemption from U.S. registration requirements and applicable U.S. state securities laws.

About American Critical Minerals' Green River Potash and Lithium Project

The Green River Potash and Lithium Project is situated within Utah's highly productive Paradox Basin, located 20 miles northwest of Moab, Utah and has significant logistical advantages including close proximity to major rail hubs, airport, roads, water, towns and labour markets. It also benefits from close proximity to the agricultural and industrial heartland of America and numerous potential end-users for its products.

The history of oil and gas production across the Paradox Basin provides geologic data from historic wells across the Project, and the wider Basin, validating and de-risking the potential for high grade potash and large amounts of contained lithium. Wells in and around the project reported lithium up to 500 ppm, bromine up to 6,100 ppm and boron up to 1,260 ppm (Gilbride & Santos, 2012). This data is reinforced by nearby potash production and the advanced stage of neighbouring lithium projects. The Paradox Basin is believed to contain up to 56 billion tonnes of lithium brines, potentially the largest such resource in US (Source: Anson Fastmarkets Presentation - <https://wcsecure.weblink.com.au/pdf/ASN/02823465.pdf>) The Company also has a 43-101 Exploration Target of 600 million to 1 billion tonnes of sylvinites (the most important source for the production of potash in North America) with average grades ranging from 19% to 29% KCL.**

The Company holds a 100% interest in eleven State of Utah ("SITLA") mineral and minerals salt leases covering approximately 7,050 acres, 1,094 federal lithium brine claims (BLM Placer Claims) covering 21,150 acres, and 11 federal (BLM) potash prospecting permits covering approximately 25,480 acres. Through these leases, permits and claims the Company has the ability to explore for potash, lithium and potential by-products across the entire Green River Project (approx. 32,530 acres). The Company is authorized to drill a total of 7 drill holes across the Project (pending bonding the recently approved 4 drill holes).

[Intrepid Potash Inc.](#) is America's largest potash company and only U.S. domestic potash producer and currently produces potash from its nearby Moab Solution Mine, which the Company believes provides strong evidence of stratigraphic continuity within this part of the Paradox Basin (www.intrepidpotash.com). [Anson Resources Ltd.](#) has advanced lithium development projects contiguous to the northern boundary of our Green River Project and neighbouring to the south. Anson has a large initial resource, robust definitive feasibility study and has recently completed successful piloting operations through its partnership with Koch Technology Solutions, as well as an offtake agreement with LG Energy Solution. The Anson exploration targets encompass the combined Mississippian Leadville Formation and the Pennsylvanian Paradox Formation brine-bearing clastic layers, which also underlie American Critical Minerals' entire project area (www.ansonresources.com)*.

In 2022, the U.S. imported approx. 96.5% of its annual potash requirements with domestic producers receiving a higher sales price due to proximity to market (intrepidpotash.com/ August 15, 2024, Investor Presentation). In March 2024, the US Senate introduced a bill to include key fertilizers and potash on the US Department of Interior list of Critical Minerals which already includes lithium, and this process is well advanced with potash being added to the USGS Draft Critical Minerals List. In August 2025. Recent market estimates suggest that the global potash market is over US\$50 billion annually and growing at a compound annual growth rate ("CAGR") of close to 5%. Annual lithium demand is now estimated to be over 1 million tonnes globally and continuing to grow rapidly. * **

**A report titled "NI 43-101 Technical Report - Green River Potash Project, Grand County, Utah, USA", prepared by Agapito Associates Inc., and dated effective September 12, 2012, quantifies the Green River Potash Project's potash exploration potential in the form of a NI 43-101 Exploration Target. The Exploration Target estimate was prepared in accordance with the National Instrument 43-101 -Standards of Disclosure for Mineral Projects ("NI 43-101"). It should be noted that Exploration Targets are conceptual in nature and there has been insufficient exploration to define them as Mineral Resources, and, while reasonable potential may exist, it is uncertain whether further exploration will result in the determination of a Mineral Resource under NI 43-101. The Exploration Target stated in the Agapito Report is not being reported as part of any Mineral Resource or Mineral Reserve. A copy of the report can be accessed on the corporate website for the Company: www.acmineralscorp.com.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This news release contains forward-looking information within the meaning of applicable securities legislation. Forward-looking information is typically identified by words such as: believe, uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking information. Important factors that could cause actual results to differ from this forward-looking information include those described under the heading "Risks and Uncertainties" in the Company's most recently filed MD&A. The Company does not intend, and expressly disclaims any obligation to, update or revise the forward-looking information contained in this news release, except as required by law. Readers are cautioned not to place undue reliance on forward-looking expect, anticipate, intend, estimate, postulate and similar expressions, or are those, which, by their nature, refer to future events. Such statements include, without limitation, statements regarding the intended use of proceeds from the Offering. Although the Company believes that such statements are reasonable, it can give no assurances that such expectations will prove to be correct. All such forward-looking information is based on certain assumptions and analyses made by the Company in light of their experience and perception of historical trends, current conditions and expected future developments, as well as other factors management believes are appropriate in the circumstances. This information, however, is subject to a variety of risks and information.

Neither the Canadian Securities Exchange nor its Regulation Services Provider (as that term is defined in the policies of the Canadian Securities Exchange) accepts responsibility for the adequacy or accuracy of this release.
