

Hi-View Resources Inc. Completes Comprehensive Analysis Confirming Gold-Silver Potential At Saunders Property

16.10.2025 | [The Newswire](#)

[Hi-View Resources Inc.](#) ("Hi-View" or the "Company") (CSE: HVW; OTCQB: HVWRF; FSE: B63) has completed a comprehensive analysis of the Saunders Property, confirming its potential as a low-sulphidation epithermal gold-silver system. The review highlights quartz chalcedony veining with adularia and strong silicification, all situated within a well-defined structural corridor that also hosts major deposits like Shasta, Lawyers and AuRORA, underscoring the Property's strong exploration potential.

R. Nick Horsley, Chief Executive Officer of Hi-View, commented: "Completing this comprehensive analysis of the Saunders Property has given us a much clearer understanding of its geology and exploration potential, the structural setting, strong quartz-chalcedony veining with adularia, and extensive silicification all support our view that Saunders is a classic low-sulphidation epithermal gold-silver system. This work allows us to refine our exploration model, focus on the most prospective structural intersections, and position the project for its next phase of targeted exploration."

Figure 1. Hi-View Resources Overview Map

The 209.6 ha Saunders Property comprises two noncontiguous claim blocks covering four known occurrences - three BC MINFILE low sulphidation epithermal systems (Saunders Northwest 094E156, Saunders North 094E155, and Saunders South 094E154) and a porphyry style target ("SOM") in the southeast corner. Mineralization is hosted in quartz ± chalcedony ± adularia veins and veinlets, with local breccia fill showing banded and colloform textures and stockworks. Alteration is dominated by silicification with argillic overprints of andesitic to dacitic volcanic and volcanoclastic rocks of the Lower Jurassic Toadogone Formation. Historical sampling at Saunders North returned up to 1.42 g/t Au and 11.7 g/t Ag. The property lies within a long-lived NNW trending structural corridor with ENE cross faults, the same district scale architecture that hosts major systems at Shasta, Lawyers, and AuRORA, providing a compelling framework for ongoing exploration.

The purpose of this analysis was to confirm the geological setting, refine the exploration model, and identify areas where structural intersections and alteration intensity suggest the highest potential for mineralization. The results of this review will be used to prioritize targets and guide the next phase of exploration. The Company is now awaiting its airborne survey results over the Saunders and will incorporate them into future exploration plans.

FORWARD LOOKING STATEMENTS:

This news release includes certain statements that may be deemed "forward-looking statements". All statements in this new release, other than statements of historical facts, that address events or developments that the Company expects to occur, are forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Forward-looking statements in this news release includes statements related to the Incentive Program and the anticipated use of proceed therefrom. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include market prices, continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. Except as required by applicable securities laws, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.

The Canadian Securities Exchange has neither approved nor disapproved the contents of this news release.
